

pears.IQXNetDBVersion

Generated schema reference. Regenerate this page from the SQL unload; keep hand-maintained business notes in the narrative namespace.

Description

Tracks the current schema version of the iqxWEB database. Used to determine whether a migration or setup procedure needs to run and to guard against applying the same update twice.

Columns

Column	Type	Null	Default	Comment
id	integer	NOT NULL		PK " row identifier (single-row table)
version	integer	NULL		Current schema version number

Primary Key

- id

Foreign Keys

- No outgoing foreign keys found.

Referenced By

- No incoming foreign keys found.

Indexes

- No indexes found.

Triggers

- No triggers found.

Original SQL

```
-- IQX database structure split by table
-- Source: IQXDatabaseStructure - with comments.sql
-- Table: "pears"."IQXNetDBVersion"
-- Table comment: Tracks the current schema version of the iqxWEB database.
Used to determine whether a migration or setup procedure needs to run and to
guard against applying the same update twice.
-- Statement count: 4
