

pears.IQXNetLanguage

Generated schema reference. Regenerate this page from the SQL unload; keep hand-maintained business notes in the narrative namespace.

Description

Stores the default terminology and label definitions used throughout iqxWEB. Each entry represents a single UI string identified by a structured key in the pattern "v2-{userclass}-{component}-{key}" (e.g. "v2-cand-registration-firstname"). These defaults can be selectively overridden per division or user class via "IQXNetLanguageOverride" without modifying the base record.

Columns

Column	Type	Null	Default	Comment
IQXNetLanguageID	char(50)	NOT NULL		PK " structured key, e.g. v2-cand-registration-firstname
Description	char(100)	NOT NULL		Human-readable description of what this label is for
DefaultValue	char(100)	NOT NULL		The default text/label displayed in the UI

Primary Key

- IQXNetLanguageID

Foreign Keys

- No outgoing foreign keys found.
