How/where can I add a link to the client's own website?

Relates to:
Client form → Client website tab

In the top left box of a client record there is a field beneath the telephone number (expand the record by clicking on the "-") for you to add a website address for the client. Once entered, just click on the 3 dots to the right of the address and it will open Internet explorer and take you to the site.

Alternatively there is a specific tab down the left of each client record called **Client website** which will automatically display the web address quoted in the field mentioned above
