Headline

IQX supports full text searches in some areas such as CVs. The syntax used is very similar to that when using search engines such as Google.

Searches are not case-sensitive, ie searching for “excel”, finds both “Excel” and “excel”.

CV examples:

```
excel word
```

finds CVs containing both “excel” and“word”

```
excel AND word
```

finds CVs containing both “excel” and “word”

```
excel OR word
```

finds CVs containing either “excel” or “word” or both

```
excel NOT word
```

finds CVs containing “excel” but not “word”
