This issue has been raised a few times

Modify to expand sample to all company vacancies, not just consultant

Modify to expand sample to all company vacancies, not just consultant

Simplify the setting up of Mongo authentication.

This job's normal purpose is to provide a library proc which sets the variables containing the Mongo uid and pwd for the current session.

With this addition you can run the job directly to initialise the appropriate Mongo users and roles. It will give instructions if you run it un-edited, and error safely if the db already contains the stuff.

Iw-837

no message

Fix contract/shift confusion and add Mongo authentication

Shift and contract desks were the wrong way round. It was assuming no authentication. Changed to IQXWeb/IQXWeb

catch up

including NetClientCreateBooking and NetClientRequirementVerifiedCandidates
