License Agreement (Cont.)

Info

When you click next the installer will check for the "IQXInstallPath" environment variable, if it exists, the installer will continue to the setup wizard, otherwise it will ask for the path to the IQX Installation folder

Find IQX Install Path

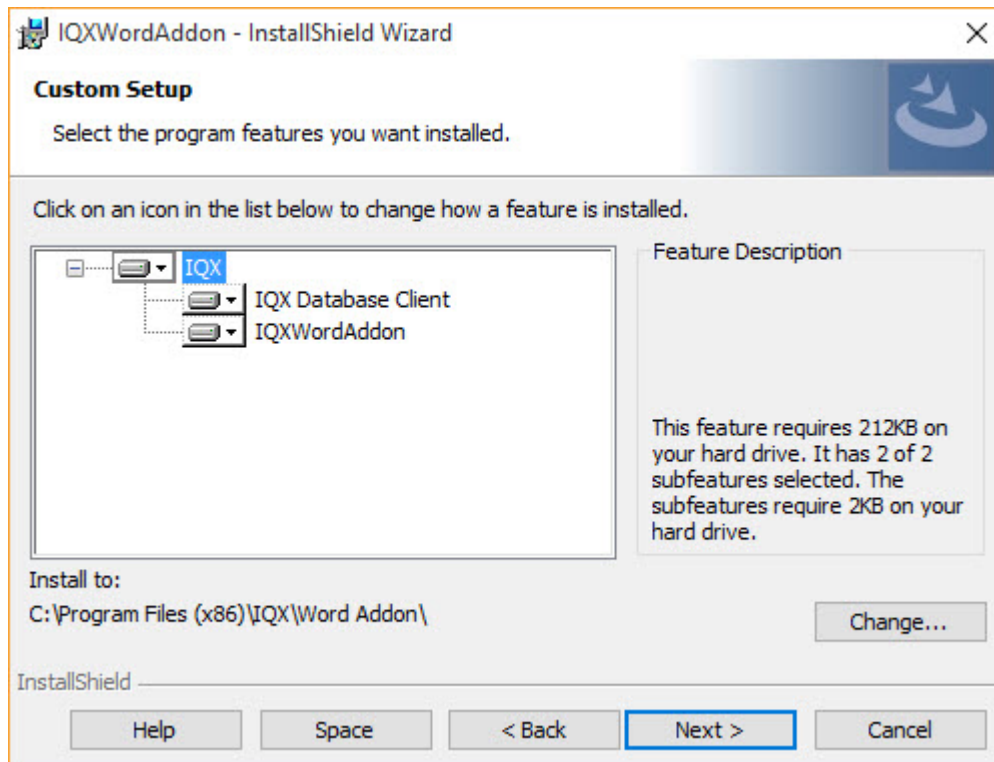

Info

Using the file browser find where IQX is installed to, when you click next this will set the "IQXInstallPath" environment variable

Custom Setup

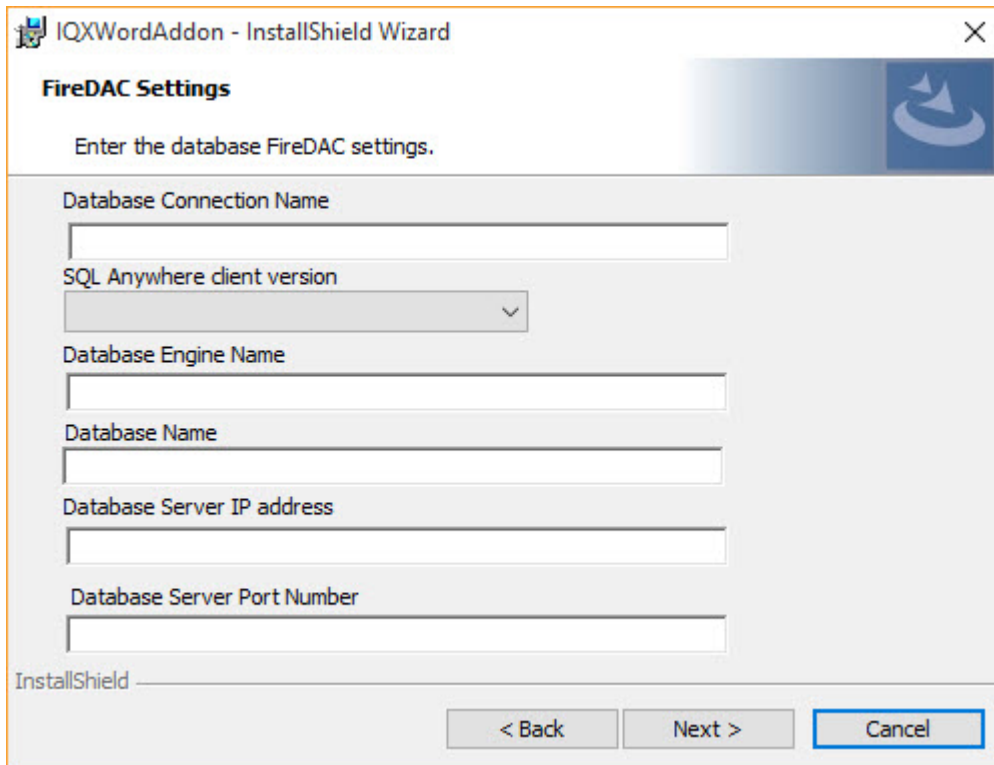

Info

Select the features you want installed

- If IQXWordAddon has been selected for installation, the installer will check your registry for the installPath key for your installed version of office

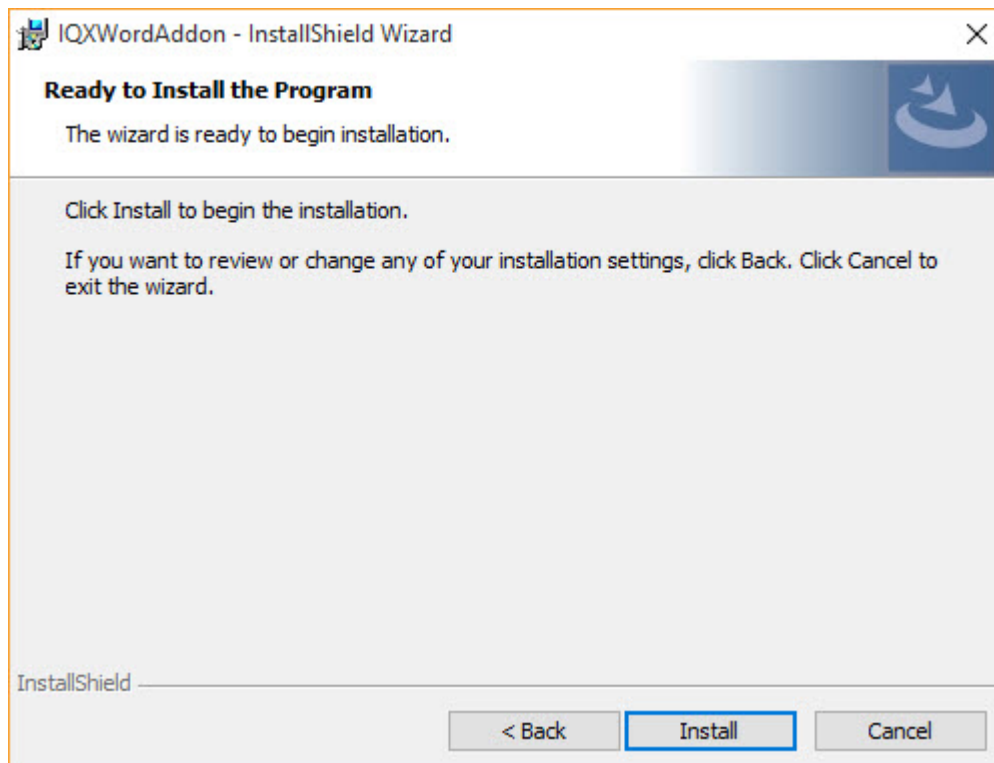

FireDAC Details

The image shows a screenshot of the 'IQXWordAddon - InstallShield Wizard' window, specifically the 'FireDAC Settings' step. The window has a title bar with the text 'IQXWordAddon - InstallShield Wizard' and a close button. Below the title bar, the text 'FireDAC Settings' is displayed in a bold font. Underneath, it says 'Enter the database FireDAC settings.' The main area of the window contains several input fields: 'Database Connection Name' (a text box), 'SQL Anywhere client version' (a dropdown menu), 'Database Engine Name' (a text box), 'Database Name' (a text box), 'Database Server IP address' (a text box), and 'Database Server Port Number' (a text box). At the bottom of the window, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'Cancel' button is highlighted with a blue border. The 'InstallShield' logo is visible in the bottom left corner of the window.

Info

After clicking next once the fireDAC details have been entered, the installer will edit the `IQX.ini` configuration file with the new details.

Ready to Install

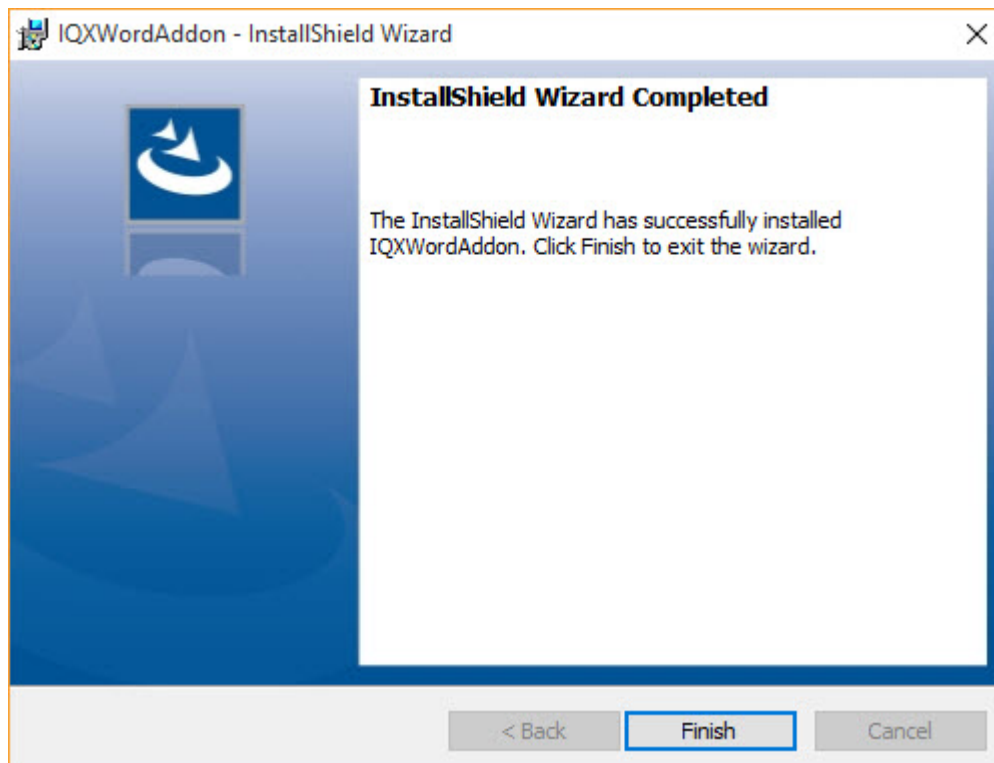

Info

Click on “Install” to start the installation process.

The Installation Process
