Release 2.2.1.45 to 2.2.1.54

Note: If you have custom forms defined in IQX, not all new features may be available to you.
* before a version number indicates that the version is available for testing, not yet fully released.
x before a version number indicates that the version is not yet available

Version	Feature / Change
2.2.1.54	Vacancy Roles view introduced. Allows additional client contacts to be associated with a vacancy, in one or more roles. Contact events can be created linking the Client Contact and the Vacancy. Roles are maintained in Agency Setup. Vacancy Roles are activated by a switch in General Settings - Switchable Views
	[April 2007]
2.2.1.50	New style CIS validation rules tightened
2.2.1.50	Facility to change the Client and Contact of a Vacancy - button on Vacancy Miscellaneous view
2.2.1.50	General Settings in Switchable Fields to control display of Department and Salary on Desktop Current Vacancies
2.2.1.50	Button to create Contact Event with candidate added to Vacancy Search Results
2.2.1.50	Sort order changed on Vacancy Short List so blank action dates sort to bottom of list
2.2.1.50	Ability to edit Shift Order Reason on Timesheet Wizard
2.2.1.49	AHL linked systems show AHL Pay Band Number or Placement and Vacancy rate views
2.2.1.49	Warning on button bar if backup fails on systems using the standard event driven backup mechanism. Clicking on the warning brings up the backup log. Warning shows for users with Maintenance or Tech Support roles. Warning only clears after successful backup recorded in backup log and user logs out and back in.
2.2.1.49	IQX Licences in Use count added to Database Diagnostics
2.2.1.49	CIS templates supporting new style CIS functionality
2.2.1.49	CIS Effective Date added to 2007 style CIS functionality
2.2.1.45	Added Publish to Web flags to Shift Cancel Reason
2.2.1.45	Added Client Note field to Temp Shift Plan for use by web interfaces
2.2.1.45	Functionality to support new style CIS verification. Includes checking format of UTR and verification code, enforcing higher rate setting for failed verifications & optional audit
2.2.1.45	Facility to cancel and re-create transmitted timesheet, where payroll and invoicing systems can support the functionality
2.2.1.45	Company Account Invoice Email field extended to 100 characters
2.2.1.45	Colour coding of permanent placement states on Placement Selector
2.2.1.45	Drop down lists of frequently used Towns and Countries can be maintained, either globally or for specific branches. Additionally default Towns and Countries can be specified at either level
2.2.1.45	New Temps General Setting to restrict changing Payroll Number to Accounts users
