

Starting IQX

- Double click on the IQX icon on your desktop.
The following screen is displayed.

A screenshot of the IQX login dialog box. The window has a blue title bar with the 'IQX' logo and a close button. The main area is light blue and contains three text input fields: 'Database' with 'IQX' entered, 'User' with 'UserID' entered, and 'Password' which is empty. Below the fields are two buttons: an orange 'Ok' button and a light blue 'Cancel' button.

- The User field is defaulted to your Windows login name. Enter your IQX User Name and Password and click OK.
- If you are logging in to IQX for the first time you may not have a password set yet, so leave the Password field blank and set a password on first login.
- An error message will appear if the details are not correct or all the licenses are currently being used. If you have any problems logging in please contact your system administrator.
