Temp Desk

If you are a Temp consultant, this view is where you will spend most of your time. Almost everything can be done from this view in relation to Temp vacancies.

Vacancies

The Temp Desk will automatically open on the Consultants default Temp desk. You can select a different Temp desk from the drop down menu in the top left of the window. From this tab there are several things you can do:

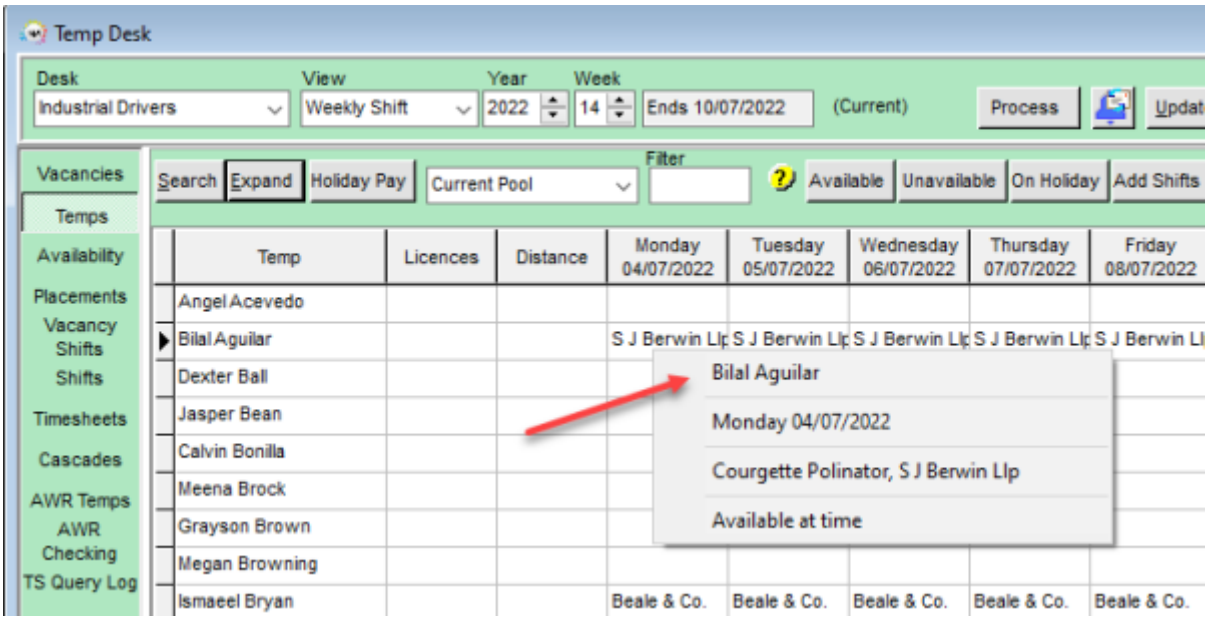

- Expand the Vacancy
- Add a new Vacancy
- Search for a Vacancy by the Company/Client name
- Add shifts to existing Vacancy
- Fill shifts for vacancy
- Confirm shifts - this will also send out a notification if you have one set up.
- Copy shifts
- Access the Timesheet for a candidate

You can also filter the Vacancies by those that have Shifts in the week, are in a Current, or have unfilled shifts in the week.

Temps

In this tab you can view all the Temps for your selected desk, and see what vacancies they are booked into. If you right click on the cell a small window will popup showing you more details about

the booking. You can access the Person record and the Vacancy record from here by clicking on the option.

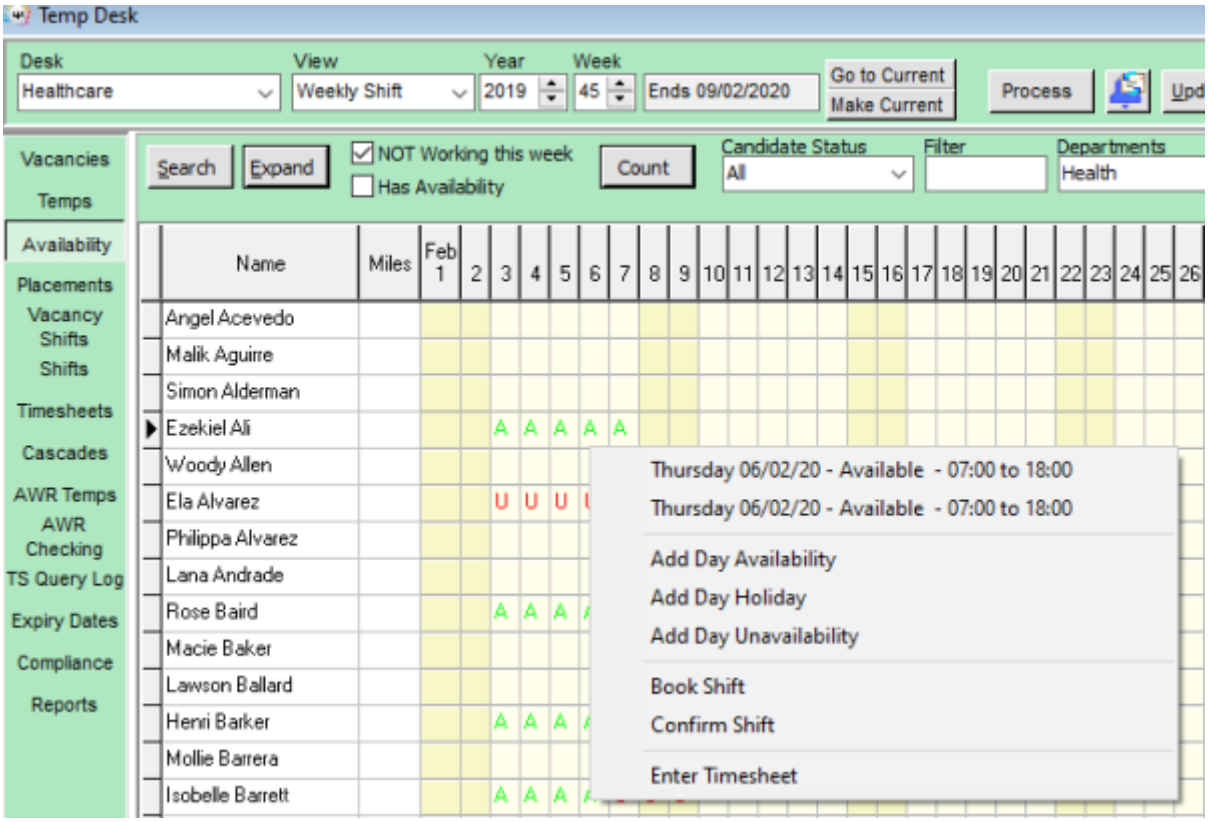

Other actions you can perform from this tab are -

- Enter Availability or Unavailability
- Enter Holidays
- Add shifts
- Book Shifts
- Confirm Shifts
- Access the Timesheet

If enabled by your Agency, you can also set the distance in miles from the postcode (vacancy)

Availability

This view shows you the Candidates Availability, Unavailability and Holidays on your chosen desk. You can view the next month or the previous month. You can also change the candidates status, filter by has availability and NOT working this week. You can also expand the Candidates record from this tab.

By right clicking on any populated cell, a new window will pop up giving you more details. From this window you can also add Availability, Unavailability and Holidays. Book shifts, confirm shifts and access the timesheet.

Placements

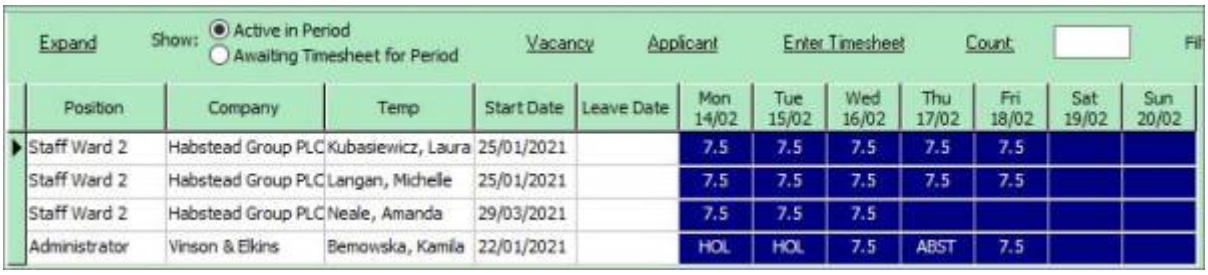

refers to:
temp desk form → placements tab

This is where you manage your group of placed candidates. All contacts can be made and recorded from this view.

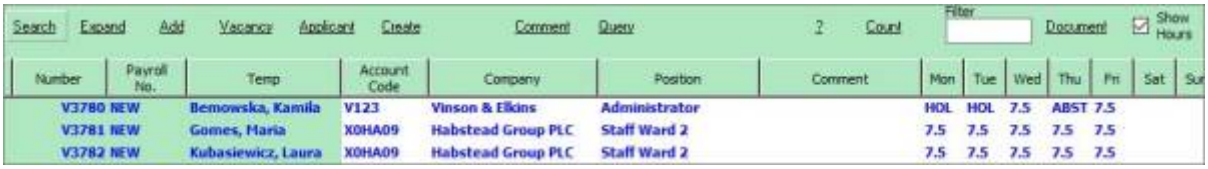

In order to save entry time a Placement is not required until a first Timesheet is Completed – IQX takes care of it in the background. This means that looking at the Placement list does NOT show who is working in the week.

If a Placement is needed because a Temp is getting different rates to the Vacancy then from the Vacancy it is possible to early-create the Placement **from the shift view** by clicking the **Placement/Rates** button. **Do not** use the normal method of adding a Placement as it will not see the shift links.

2.22.2+ If set up by your system administrator unavailability entered for a contract temp the reason is now visible onthe Placements, Timesheets and Availability views.

The Unavailability reasons will also show on the timesheet in place of the hours, if Show Hours is ticked.

Note Timesheets are generated from this list so it is important to only have current placements on this list.

Vacancy Shifts

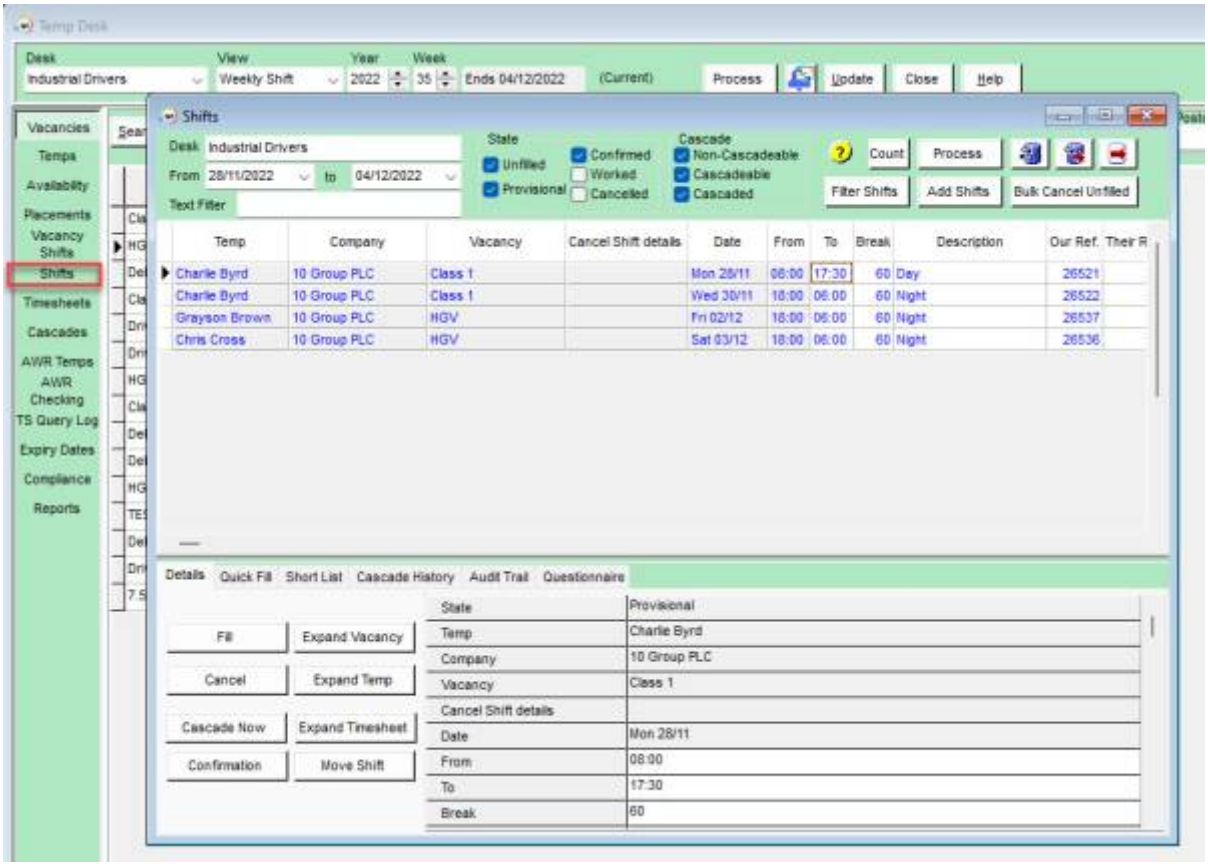

Here you will see all the filled shifts in the week for each vacancy on your chosen desk. It also shows you the name of the temp that is booked into the shift and the shift description and times. This information can be viewed full by rolling your mouse over the cell.

From this tab you can perform a count of the vacancies, confirm shifts, copy shifts, and enter timesheets.

Shifts

When you click on this tab a new window will open detailing all the shifts for the week on your selected desk. From here you can view each shift in more detail > move the arrow to the shift and all the details will be in the bottom section of the window. You will see several buttons to the left of this section detailing all the tasks you can carry out from this view. This includes, filling shifts, expanding the vacancy, cancelling shifts, expanding the Temp record, cascade, expanding the timesheet, confirm, move shift.

On the main window you can filter the shifts to narrow down what you are looking for. Add shifts and bulk cancel any unfilled shifts

Timesheets

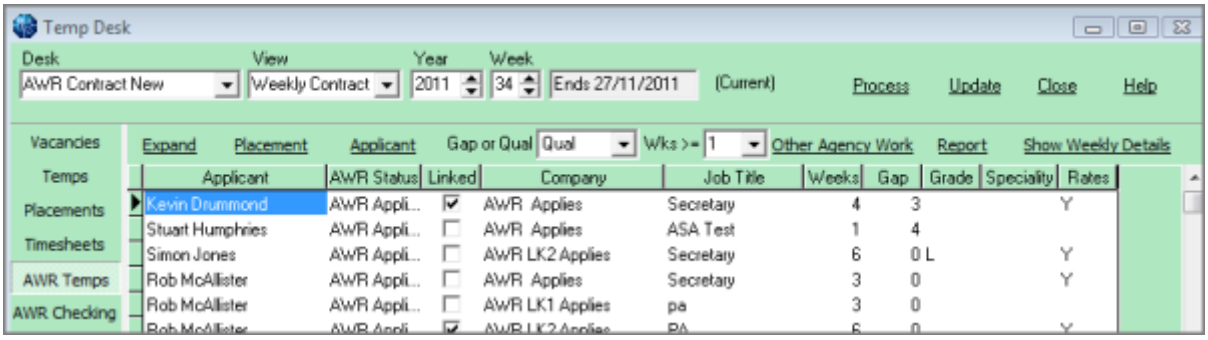

This is where you can view your timesheets, create timesheets or add new ones. You can also directly access the Vacancy Record and Person's Record by clicking the corresponding buttons in the top bar menu. By expanding up the timesheet you can complete it ready for invoicing.

AWR Temps & AWR Checking

The Temp Desk has two new views - AWR Temps and AWR Checking. These have to process a LOT of information so can be slow to load.

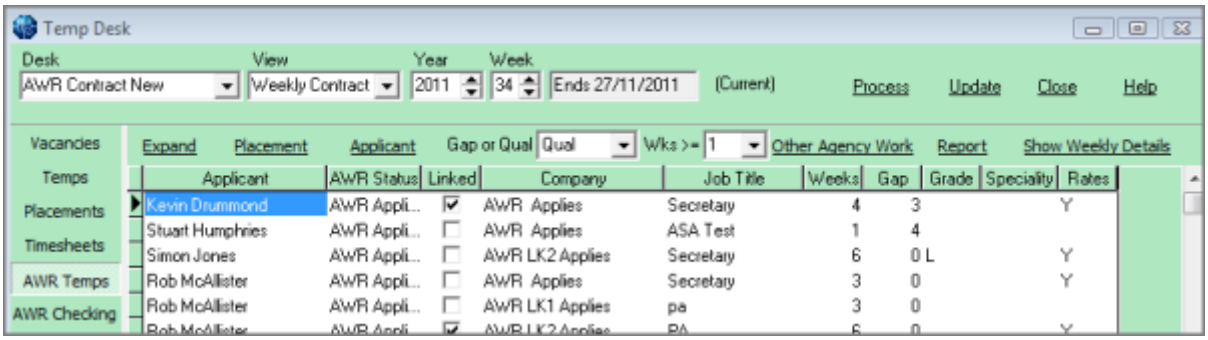

AWR Temps
This view shows the current roles for the Temps registered with the desk.
The default view is to check the roles that have 11 weeks of qualification. This can be changed to look at less weeks of qualification or to look at the gap since the last timesheet.
After six weeks of gap, the role reverts to Unqualified State with a Qualifying count of 0.

The example is showing candidates with at least one week's qualifying but in practise it should be used to see who is coming up to qualifying to ensure all the details are set up and correct.

The Show Weekly Details button will list the events that count towards qualifying and pausing the gap. Other Agency Work can also be entered from here - **make sure to choose the correct role that it is to be entered for before clicking the button.**

AWR Checking
This view shows the AWR information for Companies, Vacancies and AWR Roles (which can encompass several Placements). You can filter to just one type. The dates refer to the checked date and information can always be updated from this view.
