

How to Configure Online Web Reference ==== Under construction

email Ivan@iqx.co.uk for a copy of this - if required

1) This is the table in your IQX database. IT is usual standard so may already be there. If not use SQL statement below:

```

1) Create the WPK Form through WPKMaintain.exe.

2) Within IQX select Maintenance > Run a Job. Navigate to your reports folder and run the visualreference.xml job.

3) Once the job runs you will be asked for a client's personid. This will then make sure the request reference is assigned to the correct person.

4) Once it loads it should look like this below:

File Edit Select Accounts Maintenance Window Help

Online Reference Request

Position Details

Department *:
Job Title *:
Job Title Notes *:

Referee Details

Referee Name *: Address *:
Salutation *:
Keyname *:
Organisation *: Town *:
Referee Job Title *: County *:
Home Phone *: Country *:
Work Phone *: Postcode *:
Mobile Phone *: E-mail *:
Fax *: Start Date:
End Date:

Save/Close Close

5) You then fill in the form and Save/Close. 6) Now you should then be able to go into your person form, look for Web Reference view then you can see the references that have been created. See below:
