Web Referencing

Users can send reference requests and receive references from within IQX via the web. Referees will be able to log onto a temporary website to complete the reference which will automatically update the IQX database.

Branding, maintained in Agency Setup can be applied to emailed Reference Requests.

This functionality relies on set up by IQX staff in conjunction with System Administrators; IQXHub is also needed. More information is available: here. Please contact IQX Support for more information.

This video gives an introduction to IQX Web Referencing:
