

Bulk Importing CVs

This is only available if it is enabled - optional per agency

Bulk CV import enables the user to import multiple CVs at the same time and register the candidates against a selected division and department.

Bulk CV Import needs to be set up in the user record, please speak to your System Administrator to set this up.

The first thing the user needs to do is save the incoming CVs into the CVs folder(s) either individually or in a zip file. As you can allocate the Department and Consultant ensure you have separate folders for each and the CVs are allocated to the relevant folder.

Open the person selector screen and select Bulk CV Import to open the wizard.

The screenshot shows two overlapping windows. The top window is titled 'Person Selector' and has a sidebar with various options. 'Bulk CV Import' is highlighted in the sidebar. The bottom window is titled 'Bulk CV Import' and contains a form with the following fields:

Report	
State	Pre registration
Division	Metropolitan Nursing
Consultant	SHELLEY
Department	Nursing
Permanent	<input checked="" type="checkbox"/>
Temp	<input type="checkbox"/>
Source	

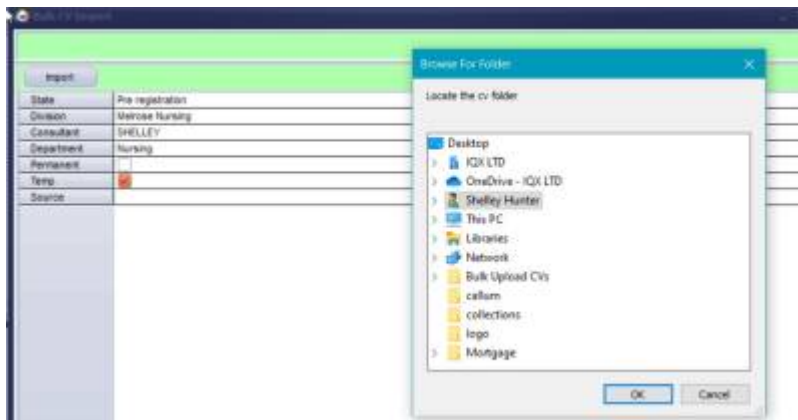

Set the initial configuration on the Import Form by checking the relevant State, Division, Consultant and Department. Select whether the candidates should be registered as temp or perm when they are imported and select the source if it is the same for all CVs.

The wizard will default to the user and their default settings but this can be amended.

Click import and select the import type. **Note** if you are an IQXanywhere user you can only import CVs from a zip file.

The screenshot shows the 'Bulk CV Import' form from the previous image, with a small dialog box titled 'Bulk CV Import' overlaid on top. The dialog box has a label 'Select Bulk CV Type' and a dropdown menu. The dropdown menu is open, showing two options: 'Zip File' and 'Folder'. 'Zip File' is selected. There are 'OK' and 'Cancel' buttons at the bottom of the dialog box.

Then browse to the location where the CVs have been saved.
If the selected location doesn't contain any files an error message will appear.

OK will start the import process and the name of each CV will be shown as they are imported.
Word and PDF documents will be picked up – anything else stored in the folder that isn't either of these formats will remain in the folder.

If you selected to upload from a folder Successfully imported CVs will then be moved to a sub-folder called Finished and CVs that could not be imported, because of format problems, will be moved to a folder called Rejected. These CVs will need to be added to IQX manually.

If you selected to upload from a zip file you will be prompted to save an excel file that will detail which CVs were successfully uploaded and which were rejected and need to be added manually.

Once all of the CVs have been imported and parsed the following screen will appear:

Forname	Surname	Date of Birth	Postcode	Address 1	Address 2	Address 3	Town
Tom	Barbour		YR4 5JL	34 Yemen Road, Yemen			
Betty	Best						
Hannah	Belle		MCT8 5DR	Sycamore Terrace, M...			
Timothy	Biggerstaff		SP12 7PS	Database Administrator		123 Foxstret Road, Sto...	
Karen	Brown		YR4 5JL	34 Poteraworth Road...			
Clair	Butler		MCT8 5DR		Calendar Terrace, Ma...		
Clarice	Campbell		MCT8 5DR	Fairbloom Terrace, Ma...			
Kim	Cartwright		SP12 9DS	C Developer		Congress Avenue, St...	
Gordon	Clegg		SP12 9DS	C Developer		Springhome Road, Sto...	
Jonathan	Cooper		SP12 9DS	C Developer		Hi-law Terrace, Suna...	
Catherine	Coulter		SP12 7PS	Database Administrator		123 Shilling Road, Sto...	
Kenneth	Devour						
Timothy	Farnell		YR4 5JL	34 Cooke Road, Stoc...			
Cara	Fisher		YR4 5JL	34 Magnesium, Stock...			
William	Foster		YR4 5JL	34 Pterodactyl Road...			
John	Glenford		MCT8 5DR	Goldmine Terrace, Ma...			
Tom	Gordon						

Individual cells can be edited and the record updated – if you see data that is obviously wrong it can be immediately corrected. Changes that are made on this screen once updated will be updated on the candidate record.

From this screen:

Expand – will open the person record that has been created on the Contact Events View.

CV – will open the person record on the CV tab. You can change the fields if they haven't been pulled through correctly when the CV was parsed. This is done by highlighting the word, right-clicking and selecting the relevant field. It is not possible to remove information this way – you need to delete it from the record.

Delete - will delete the new record for the selected line.
