

I am trying to cancel a shift but it won't let me

A 'worked' shift cannot be cancelled. This means that there is a completed timesheet associated with this shift.

Within a vacancy or candidate diary, if you right click on the shift that is showing as worked then there will be no option to cancel.

Looking at the Shifts view from the Temp Desk, filter and then click on the shift in question to select it. View the details below. If it is showing as State WORKED then it means there is a timesheet. Click on Expand Timesheet and use the Cancel / Correct facility. See [Editing Timesheets](#) for more information.

The screenshot shows the iqx Shifts interface. At the top, there's a 'Shifts' window with filters for Desk (Health - shifts desk), State (Unfilled, Confirmed, Provisional, Worked, Cancelled), and Cascade (Non-Cascadeable, Cascadeable, Cascaded). Below the filters is a table of shifts. The selected shift is highlighted in yellow.

Once the timesheet is cancelled, the shift will return to an un-worked (provisional or confirmed) state

that can then be cancelled in the usual way. See [How to cancel a filled shift](#) for more information.

It is possible to set up a Shift Cancel Reason to be used when you cancel a timesheet, so that it is done when cancelling the timesheet. Maintenance> General Settings> Temps> 76

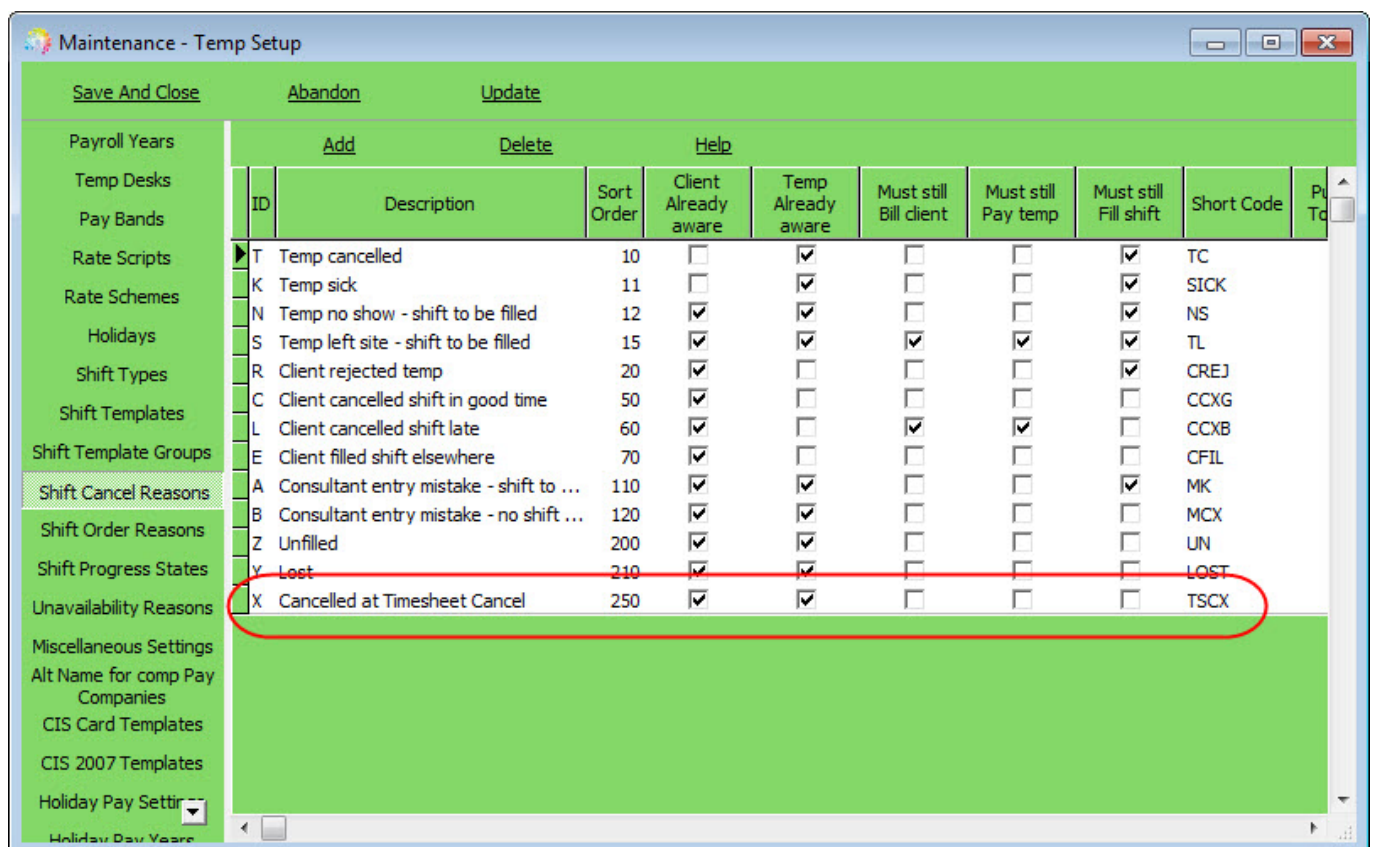

The screenshot shows the 'General Settings' window for 'Temps'. It has a table with columns: No, Group, Name, Value, and Notes. The row for '76 Temps' is highlighted, and the 'Value' field contains 'X', which is circled in red. The 'Notes' column for this row says 'Must be one of the single character Shift Cancellation Reason...'. Other rows include '75 Temps' and '80 Temps'.

No	Group	Name	Value	Notes
75	Temps	Allow Timesheet cancel for these P...	12	Completed timesheets belonging to this list (no separators) ...
76	Temps	Shift cancel reason to use in Times...	X	Must be one of the single character Shift Cancellation Reason...
80	Temps	Enforce Rank Details validity on Tim...	M	Default is to Warn if invalid but allow override

The value entered is the single character ID for the relevant Shift Cancel Reason in Temp Setup.

Consider carefully the actions related to the shift cancel reasons, and tick the relevant options according to how you want the cancelled shifts to be handled.

The screenshot shows the 'Maintenance - Temp Setup' window. It has a table with columns: ID, Description, Sort Order, Client Already aware, Temp Already aware, Must still Bill client, Must still Pay temp, Must still Fill shift, Short Code, and P. The row for 'X Cancelled at Timesheet Cancel' is circled in red. The 'Client Already aware' and 'Temp Already aware' checkboxes are checked for this row. The 'Short Code' is 'TSCX'. Other rows include 'T Temp cancelled', 'K Temp sick', 'N Temp no show - shift to be filled', 'S Temp left site - shift to be filled', 'R Client rejected temp', 'C Client cancelled shift in good time', 'L Client cancelled shift late', 'E Client filled shift elsewhere', 'A Consultant entry mistake - shift to ...', 'B Consultant entry mistake - no shift ...', 'Z Unfilled', 'Y Lost', and 'X Cancelled at Timesheet Cancel'.
