Boiler Plate Text (Standard Text/AutoText)

Set Up Boiler Plate Text

Boiler Plate Text, (BPT), allows the setting up of blocks of standard text which may be easily dropped into the current cursor position of the various free text notes fields.

Useful for such things as meeting note headings, job description outlines or standard blocks of text for sending emails.

Set up in Maintenance> Agency Setup> Boiler Plate Text.

Select whether you want the text to be accessible from:

- Company
- Vacancy
- Contact Event
- Company
- Applicant
- Text Message

The Type given to the Boiler Plate Text will determine where in IQX it can be used. For example, Progress type is available from the Insert Text on a progress record but if you want to use that block of text in a contact event from a progress record then it needs to be set up as a Contact Event Type.

Text Message Type is used for sending SMS/Email from Shift Booking or Shift Confirmation.

Mail Merge Text buttons use the Contact Event Type.

Insert a relevant Description, Division, (leaving this blank allows all Divisions to use the BPT), and a sort order.

Double click on the boiler plate text field to open the box to enter the text.

When inserting boiler plate fields, please make sure the fields are surrounded by {}s.

```
eg {APP_NAME}, {COM_NAME}...
```

The fields that are available for the Boiler Plate Text will depend on where the text is being inserted from. For example if you are making a contact event from the candidate record the Applicant Fields will be the only fields that are available. However, if you make the contact event from a placement record then the applicant, company, vacancy, placement and progress fields will be available.

Applicant Fields

Accessible from Applicant, Vacancy, Placement or a Contact Event (if it has a link to a Company, Vacancy, Placement record or via Shift Confirmation).

```
Boiler Plate Field  Table    Field             Example
APP_NAME            Person   Name              Mr Fred Smith

VAC_SITEPHONES	Vacancy	SitePhoneNumbers	01835 340034
VAC_SITEROLE	Vacancy	Role	Manager

Shift Fields

Accessible from Shift Confirmation buttons and can also be passed through to contact events via the shift confirmation and tempdesk – shifts screen.

Can use **either** Shift Details **or** {SHF} fields but **not both**, if SHIFTDETAILS is used then none of the {SHF} fields will be available.

```
Boiler Plate Field  Example
SHIFTDETAILS        01/02/2012 13:00-17:00
```

OR

```
Boiler Plate Field  Example
SHF_DATE          1/1/2015
SHF_FROM          8:00
SHF_TO            10:30
SHF_NOTE          Notes
SHF_BREAKMINUTES  30
SHF_WHENCANCELLED 1/1/2015
SHF_THEIRREF      A/1234
SHF_CANCELREASON  Holiday
SHF_WHENCANCELLED 1/1/2015
SHF_PERSON        Mr Fred Smith
SHF_CLIENTCONFIRMED 1
SHF_TEMPCONFIRMED  1
SHF_STATE         P
SHF_STATEDESC     Provisional
SHF_SERIALNUMBER  12345
```

It is possible to list all shifts applicable (up to 365 days in advance) to an applicant. The shifts do not have to be referenced in the Shift Confirmation Screen. This means that when confirming shifts you need only tick against one shift for a temp and it will list all of the shifts.

{SHR_BEGIN}{SHR_DATE dd/mm/yyyy} {SHR_FROM} – {SHR_TO}{SHR_END}

Would output something like:

```
01/07/2016 08:00 – 17-00
02/07/2016 08:00 – 17-00
03/07/2016 08:00 – 17-00
04/07/2016 08:00 – 17-00
```

SHR_BEGIN, can be replaced with {SHR_BEGIN_n}, where n is replaced by a number, e.g. {SHR_BEGIN_28}, which will list provisional/booked shift, in the period, current date →current date + 28 days.

Note It is the current date that the Shift Range starts from and not the date of the shift you a confirming. This means that if you a confirming a shift in the future the SHR command might not list all of the shifts from the date you are confirming on.

These fields cannot be used with {SHIFTDETAILS}.

Shift Matching Fields

Boiler Plate Field Example

```
SHIFTDETAILS         01/02/2012 13:00-17:00
SHF_DATE        1/1/2015
SHF_FROM        8:00
SHF_TO          10:30
SHF_THEIRREF        A/1234
```

If you wish to contact a candidate about their availability for more than one shift you can use {SHF_BEGIN} and {SHF_END} to list the shifts.

{SHF_BEGIN}{SHF_DATE dd/mm/yyyy} {SHF_FROM} {SHF_TO}{SHF_END} {COM_COMPANYNAME}

Would output something like:

```
01/07/2016 08:00 – 17-00
02/07/2016 08:00 – 17-00
03/07/2016 08:00 – 17-00
IQX Limited
```

These fields cannot be used with {SHIFTDETAILS}.

Colleague Fields

ONLY accessible from Shift Confirmation button. Enables you to include the details of other candidates booked in to the same shift when confirming shifts.

```
Boiler Plate Field  Example
{COL_DATE}       01/01/2016
{COL_FROM}       09:00
{COL_TO}         17:00
{COL_NOTE}       Notes
{COL_BREAKMINUTES}  30
```

```
{COL_THEIRREF}        A/645
{COL_CANCELREASON}    Holiday
{COL_WHENCANCELLED}   01/01/2016
{COL_CLIENTCONFIRMED}    1
{COL_TEMPCONFIRMED}   1
{COL_STATE}        P
{COL_STATEDESC}       Provisional
{COL_SERIALNUMBER}    9876
{COL_ORDEREDBY}       Jack Jones
{COL_CLIENTNOTE}      Client Notes
{COL_APP_NAME}        Fred Smith
{COL_APP_SURNAME}     Smith
{COL_APP_ADDR1}       Wester Newhouse
{COL_APP_ADDR2}       Lilliesleaf
{COL_APP_ADDR3}
{COL_APP_TOWN}        Melrose
{COL_APP_COUNTY}      Scottish Borders
{COL_APP_COUNTRY}     Scotland
{COL_APP_MOBILE}      07777 XXXXXX
{COL_APP_EMAIL}       support@iqx.co.uk
```

Progress Fields

Accessible from Progress, or a ContactEvent (if it has a link to a Progress Record)

Boiler Plate Field	Table	Field	Example
PRG_STATUS	Progress	Status	C
PRG_ACTIONDATE	Progress	ActionDate	01/01/2012
PRG_INTERVIEWDATE	Progress	InterviewDate	01/01/2012
PRG_INTERVIEWTIME	Progress	InterviewTime	12:45

Placement Fields

Accessible from Placement, or a ContactEvent (if it has a link to a Placement Record)

Boiler Plate Field	Table	Field	Example
PLC_SALARY	Placement	Salary	20000
PLC_POSITION	Placement	Position	Desktop Support
PLC_STARTDATE	Placement	StartDate	01/01/2012
PLC_LEAVEDATE	Placement	LeaveDate	01/06/2012
PLC_DEPARTMENT	Employment	Department	Support
PLC_PLACEDATE	Placement	PlaceDate	01/12/2011

Additional Phone Type Fields

These can be accessed (if present in the database, Agency Set Up – Phone Types) in the format of COM_PHN_<phonetype name>

```
E.g.

COM_PHN_SKYPE       xxxxxx
COM_PHN_FACEBOOK    xxxxxx
COM_PHN_LINKEDIN    xxxxxx
APP_PHN_SKYPE       xxxxxx
APP_PHN_FACEBOOK    xxxxxx
APP_PHN_LINKEDIN    xxxxxx
```

Only if the corresponding APP_PHN_E-MAIL or COM_PHN_E-MAIL field is available.

Custom Word Merge Fields

Access via Maintenance→Database Setup.

All merge fields can be accessed from within boiler plate text, if they follow same rules as above

i.e.

Applicant Fields : Accessible from Applicant, Vacancy, Placement or a ContactEvent (if it has a link to a Company, Vacancy, Placement record).
Company Fields : Accessible from Company, Vacancy, Progress or a ContactEvent (if it has a link to a Company, Vacancy or Progress record).
Vacancy Fields : Accessible from Company, Vacancy, Progress, Placement, or a ContactEvent (if it has a link to a Company, Vacancy, Progress or Placement record).
Progress Fields : Accessible from Progress, or a ContactEvent (if it has a link to a Progress Record).
Placement Fields : Accessible from Placement, or a ContactEvent (if it has a link to a Placement Record).

How to name a Custom Word Merge Field :-

The same conventions apply, use the FieldCategory to determine the prefix

```
Applicant Fields      Starts with APP_\\
Company Fields        Starts with COM_\\
Vacancy Fields        Starts with VAC_\\
Progress Fields       Starts with PRG_\\
Placement Fields      Starts with PLC_\\
Contact Event Fields    Starts with CON_\\
Branch Fields         Starts with BRN_\\
```

After the prefix, add on the FieldName

```
e.g.
APP_UPPERTOWN
PLC_MINPAY
```

The resulting name must be unique, i.e. if it is already a predefined boiler plate name, it will not be accessible. E.g. APP_NAME.

Questions

Allows access to both the question answer and the description

QTN_<Type>_<Tag Location>_<Tag Question ID>

eg

```
QTN_A_P_CUR   This could return the question answer for an applicant
question CUR (currency)
QTN_D_P_CUR   This could return the question description for an applicant
question CUR (currency)
```

Sub menu selection not currently supported. Multiple / Graded and Scored Selection are output in a comma separated list.

A question answer will only be evaluated if the question is applicable to the rest of the substitutions.

Letter / Consultant Fields

All fields staff with 'LET_'

```
Boiler Plate Field  Example
LET_TODAY         1st January 2015
LET_TODAY_dd/mm/yyyy   01/01/2015
LET_ADDRESSLONG     Wester Newhouse, Lilliesleaf, Melrose, TD6 9JT
LET_ADDRESS     Wester Newhouse
          Lilliesleaf
          Melrose
          TD6 9JT
LET_CONSULTANT      Fred Smith
LET_CONSULTANTTITLE Administrator
LET_CONSULTANTEMAIL fred@iqx.co.uk
```

Boilerplate menu list size switch

(2.3.5+)

A switch has been inserted to the boiler plate menu column so they do not stretch beyond the screen.

This feature will require System Administrator setup.
