

Using PostCode Look-up

Introduction

This functionality is only available if you have purchased a subscription to the Post Office's postcode database (PAF) from IQX¹⁾.

PostCode Look-up is available for Person, Company and Vacancy Site addresses. The examples are all taken from the Person form, but the system is used in just the same way in the Company and Vacancy forms. As well as speeding up address entry, PostCode Look-up helps to ensure accurate and correctly formatted addresses.

How to Use PostCode Look-up

When entering an address (in either an existing or a new record) move the cursor to the first line of the address.

If you know the building name or number enter it followed by a semi-colon and then the PostCode:

Register Applicant	
Enter Applicant details	
Division	The Agency
<input type="checkbox"/> Name	Joe Bloggs
Surname	Bloggs
Forenames	Joe
Full Name	Joe Bloggs
Salutation	Joe
Keyname	BLOGGSJOE
State	Awaiting References
Available From	11/07/2013
<input type="checkbox"/> Personal	Male 25
Gender	Male
Payroll Title	Mr
Date of Birth	01/01/1988
NI Number	HJ454545A
Home Phone	020 7456 1616
Day Phone	
Mobile	07987 453345
E-mail	jbloggs@hotmail.com
<input type="checkbox"/> Address	56,
Address	56,SW5 9TF
Town	
County	
Country	
Postcode	SW5 9TF
Source	
Consultant	STEVESM
<input type="checkbox"/> Registered	Date 11/07/2013
Last Updated	
< Back Next > Cancel	

Just type in the PostCode by itself, if you don't have the building number or name. Then press the button and the address will then be looked up and the address fields in IQX filled in.

Configuring PostCode Look-up

There are a number of options that you can use to control PostCode Look-up. These are all found in Maintenance | General Settings in the PostCode Options group.

No	Group	Name	Value	Notes
10	Post Code Options	Include Counties	Y	Include traditional county names in looked-up addresses outside major cities
20	Post Code Options	Include Home Countries	Y	Add England, Scotland, Wales or Northern Ireland to addresses
30	Post Code Options	Override Country		Adds standard country name (eg United Kingdom) to all looked up addresses. Overrides other settings.
40	Post Code Options	Post Code Not Found Message		Message displayed if post code not found. If empty no messages is displayed.
50	Post Code Options	Show Address Lookup Button	Y	

In particular, you can control whether or not County and Country names are included in the looked-up addresses.

IQX also has the ability to validate addresses of new and edited records to help maintain data quality. The Validate Address function can be used to check for valid PostCodes, and properly completed address fields. Please contact your IQX Support Representative for help with this function.

Notes for System Administrators

The PostCode data is maintained centrally in IQX, no updates are required to individual client machines. The data includes UK postcodes that relate to a physical address (ie not PO Box numbers etc), and does not include non-UK PostCodes (eg Isle of Man, Jersey etc).

IQX can supply updates quarterly, but some new developments or re-coded areas may not be available immediately. Reading in the update file can take some time.

The PostCode data used by IQX is derived from the Royal Mail PAF database, and can only be used in strict accordance with the Royal Mail terms and conditions.

Please take a look at our Postcode Lookup Video: <https://vimeo.com/334940196>

1)

If you need to check whether PostCode Look-up has been activated on your system, check the IQX Licence in Maintenance | Database Setup | Licence and look for PostCode Lookup Enabled and an expiry date.
