* Where Chromebook device supports Android apps

- Candidates can now see what shortlist they are on by going to iqxWEB - jobsearch/applied or click jobs/applied in the menu
- You can now add a note when applying for a vacancy in job search

Enhancements

- Ability to search users and add 'overrides' (equivalent of rights assigned in IQX) as currently you can remove/edit them but not add them. Ability to reset password for a user
- Added switchable option to enable a register button on the login page
- You are now able to cancel a wrongly entered shift on Timesheets
- Core changes to iqxWEB to allow for apps

Bug Fixes

- Fixed an issue with favourites where folders were empty
- Fixed an issue where errors would appear as internal errors rather than user errors
- Fixed an issue where you were able to duplicate the same shift on a timesheet
- Archived documents will no longer show for the candidate in their documents view
- Fixed an issue with iOS and OSx browsers having issues decompressing the app.js files
