

Release 2.16.10

If you have custom forms defined in IQX, not all new features may be available to you. Your agency custom forms are shown on Help – About.

- [User](#)
- [System Administrator](#)
- [Fixes and Enhancements](#)

Users

Broadbean - Switchable Job description/Vacancy Notes

A new switch has been added to IQX which allows either the Vacancy Job Description or Vacancy Notes to be added to Broadbean advert.

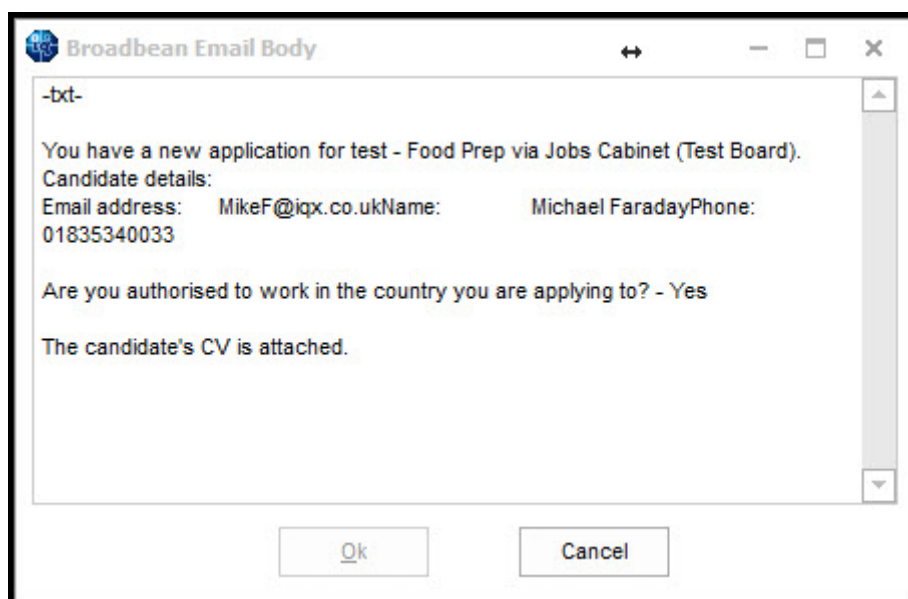

This requires System Administrator set up.

Broadbean hybrid duplicate record check

When importing a candidate from Broadbean the first line of the address and postcode of the candidate is now included. This will allow this information to be compared with possible duplicates. Additional information has been added to the duplicate candidate window showing candidate state and alert information.

Broadbean Email Body Text saved in IQX

The source of the application and email body text is now visible in the Import Candidate and add to Shortlist view. The email body text is stored as a contact event in the candidate record.

This requires System Administrator setup.

Semi-automatic import of Suitable candidates

Where Broadbean has ranked CVs outside IQX, 'Suitable' candidates can now be semi-automatically imported into IQX. When users press the Retrieve Candidates button, the Import Candidate And Add to Shortlist view is automatically called for each new 'Suitable' Candidate.

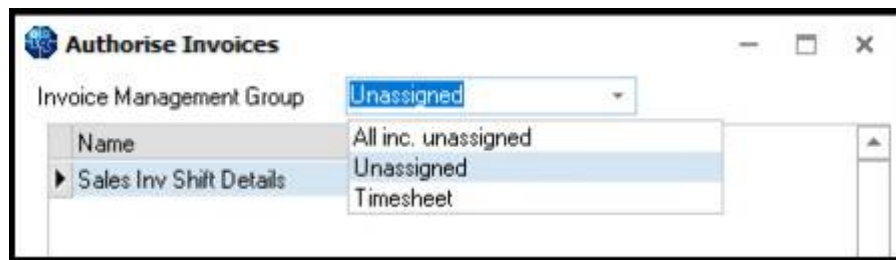

Where there are potential duplicate candidates that are Duplicate Candidate window will be displayed.

A screenshot of the 'Add Person' dialog box in the IQX system. The dialog has a light green background and a title bar with a close button. It contains several input fields for personal and contact information: Surname (Faraday), Forenames (Michael), Full Name (Michael Faraday), Salutation (MICHAEL), Keyname (FARADAY MICHAEL), Email (MikeF@iqx.co.uk), Mobile (empty), Home Phone (01835340033), and Work Phone (empty). Below these is a section for address and other details: Address (Gauss Road, Canterbury, Kent, CT9 9ZZ), State (Client), Source (a dropdown menu), and a button labeled 'Broadbean Email Body'. At the bottom, there is a Division dropdown menu set to 'International', a Notes text area, and three buttons: 'Ok', 'Cancel', and 'Help'.

This requires System Administrator set up.

Invoice management Group option of unassigned added

In Invoice Temp Timesheets, Authorise Invoices and Send invoices the option to select and view unassigned timesheets has been added.

Invoicing, attaching timesheets. If general setting is on can turn off at company

When invoicing, the choice of NOT sending linked timesheets with an invoice can be set at global and account level.

The local setting is in Company - Accounts - Invoice PDF exclude timesheets.

Generally, local settings override global settings.

This requires System Administrator setup to activate the global setting.\

Timesheet image linking. Period column added

In Accounts - Timesheet image linking a period column has been added to the display.

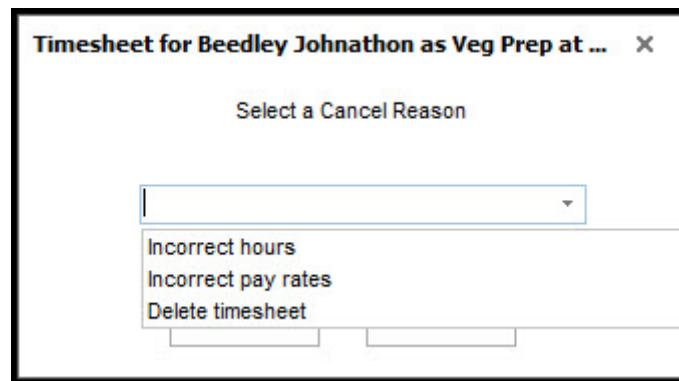

L	Number	Period	Payroll No.	Temp	Company	Position	Comment	ScanPathFilename
U	4604	201622	50171	Paul, Smith	Hawkins Brown Ltd.	Driver		

Timesheet entry from Person. Tempdesk defaults to latest timesheet or a registered desk

The default temp desk has been set to the latest timesheet or the registered desk of the candidate when entering timesheets. This ensures that the timesheet has an appropriate temp desk for that candidate.

Timesheet. Cancel reasons can be used

The timesheet Cancel or Correct process has been enhanced by the inclusion of a drop-down list of previously set up reasons e.g. rates, client, hours, breaks.

The reasons will appear on both the cancelled and amended timesheets.

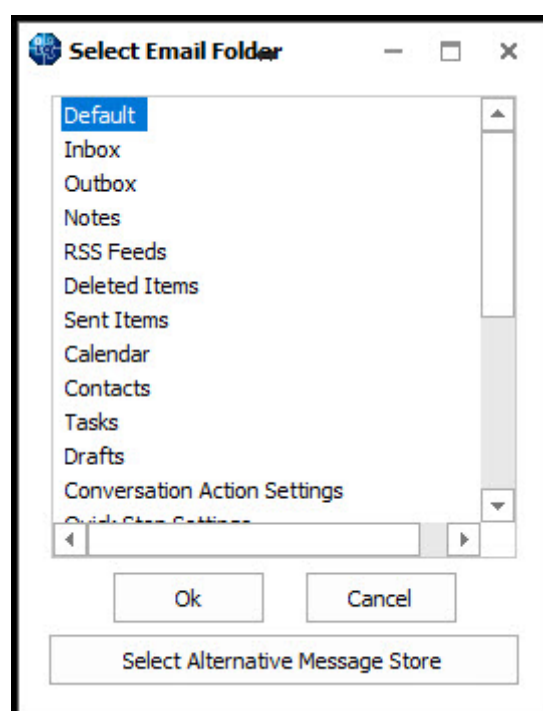

This requires System Administrator set up.

Timesheet, Cancel/Correct. Block contra, improve workflow

Workflow has been improved to silently block the cancelling of contract timesheet.

Access message store other than default

In Desktop - Inbox it is possible to change the default message store by clicking change folder and selecting a new message store.

The new selection is immediately displayed. For example, if all IQX emails are set to be stored in a specific folder this folder can be displayed automatically in the users inbox.

Access folder other than Inbox

It is also now possible to select an alternative message store for displaying with IQX inbox. For example, a group email store like admin@IQX.co.uk can be set to populate the user's inbox.

Vacancy. Compliance Questions view added

Compliance questions can now be added to the General and Department Vacancy Questionnaires and grouped using the -200 grouping.

Update Save and Close Abandon Help

Desktop, CE due for callback. Time added to callback column

In Desktop - Contact event time has been added to the callback column.

Callback by	Done	Consultant
30/05/15 12:25	<input type="checkbox"/>	IVAN
30/05/15 15:4	<input type="checkbox"/>	IVAN
31/08/16 17:07	<input type="checkbox"/>	IVAN

SQLTool. Line numbering and go to line added

In Maintenance - SQL Tool line numbering and a 'go to line number' sections have been added.

The screenshot shows the SQL Tool interface. The top toolbar includes buttons for Execute, Browse, Previous, Next, Open, Save, Clear, Number Lines, Go to line 50, Commit, Rollback, and Plan. The SQL query is displayed in the main area, with line 50 highlighted in yellow. The query is as follows:

```
37 isnull(tempjobrate.filter2,'Z') as solid,  
38 isnull(tempjobrate.filter1,'Z') as soawr  
39  
40 from tempjobrate key join tempjobband  
41 where tempjobrate.placementid = :pplacid and  
42 isnull(enddate,:pcutoff)>=:pcutoff and  
43 (tempjobrate.grade is null or tempjobrate.grade like isnull(entitygrade(:pvacid,:ppersid,:pplacid,null),'%')) and  
44 (tempjobrate.filter1 is null or tempjobrate.filter1 like isnull(entityratefilter(1,null,:pvacid,:ppersid,:pplacid,null),'%')) and  
45 (tempjobrate.filter2 is null or tempjobrate.filter2 like isnull(entityratefilter(2,null,:pvacid,:ppersid,:pplacid,null),'%')) and  
46 (tempjobrate.filter3 is null or tempjobrate.filter3 like isnull(entityratefilter(3,null,:pvacid,:ppersid,:pplacid,null),'%'))  
47  
48 union all  
49  
50 select
```

In addition, pressing Ctrl + A acts as a shortcut to select all SQL.

The screenshot shows the SQL Tool interface with the entire SQL query selected. The selection is indicated by a blue highlight across all lines of the query. The query is as follows:

```
37 isnull(tempjobrate.filter2,'Z') as solid,  
38 isnull(tempjobrate.filter1,'Z') as soawr  
39  
40 from tempjobrate key join tempjobband  
41 where tempjobrate.placementid = :pplacid and  
42 isnull(enddate,:pcutoff)>=:pcutoff and  
43 (tempjobrate.grade is null or tempjobrate.grade like isnull(entitygrade(:pvacid,:ppersid,:pplacid,null),'%')) and  
44 (tempjobrate.filter1 is null or tempjobrate.filter1 like isnull(entityratefilter(1,null,:pvacid,:ppersid,:pplacid,null),'%')) and  
45 (tempjobrate.filter2 is null or tempjobrate.filter2 like isnull(entityratefilter(2,null,:pvacid,:ppersid,:pplacid,null),'%')) and  
46 (tempjobrate.filter3 is null or tempjobrate.filter3 like isnull(entityratefilter(3,null,:pvacid,:ppersid,:pplacid,null),'%'))  
47  
48 union all  
49  
50 select
```

Placement. Read-only vacancy roles view added

Users can now view contacts with roles within Placement – Vacancy Roles as Read Only so that if a contact does not have the appropriate role it can be added Vacancy – Vacancy Roles.

Contact	Job Title	Department	Role
Yary Hall			Contract Manager

Option on changing Placement Leave date to offer to change Vacancy end date

When changing a contract desk placement leave date IQX will also offer to change the vacancy end date to keep the vacancy end date and placement leave date in sync.

In addition, a user is offered the opportunity to Set the Vacancy to filled.

Tempdesk - Timesheets - Clear All Dispatch Details

In temp Desk - Timesheets to new columns are been added which sure dispatch date and dispatch method. Right click on the column headings 'Dispatch Date ' or 'Dispatch Method ' will allow a user to clear either one or all dispatch details.

Comment	Dispatch Date	Dispatch Method
	13/10/2016	EM
	13/10/2016	EM

Notifications

An alternative to Branding is being developed to improve notification workflow. A robust system for

shift notifications is the first stage of this process.

This change affects Shift Match/Book and Shift Confirmations.

In shift confirmations tick boxes on the right hand side of the view allow the user to to notify client and/or temp for shift confirmations and cancellations.

Events

Each shift confirmation email or SMS allows the selection of available templates; creation of a contact event; additional removal of recipients; inclusion of attachments and the ability to edit the email/SMS prior to sending. The refresh button allows the user to remove any changes made. The expand button enables the user to open records related to the email e.g. company, vacancy etc.

In Shift Match/Book the procedure is the same as above.

IQX is available to give assistance with setting up this functionality.

Add function to configure Alert in Expiry Date view

Additional information can be added to the alert column in expiry date.

Information is displayed in the alert column at Temp Desk – Expiry Dates.

This requires System Administrator set up.

Person, Payroll. Checkers for IBAN and Swift on ellipses

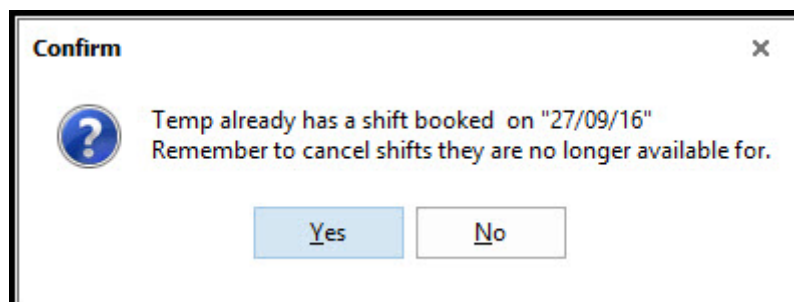

In Person – Payroll - checkers for IBAN and Swift banking numbers have been added as ellipses at the end of both fields. These ellipses take the user to websites where IBAN and Swift numbers can be verified.

System Administrator

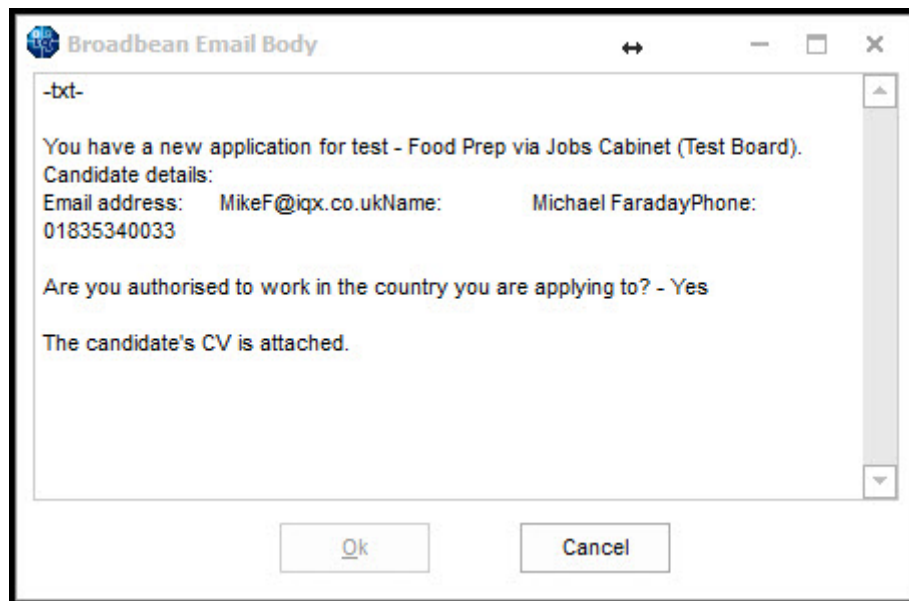

Broadbean - Switchable Job description/Vacancy Notes

A new switch has been added to IQX which allows either the Vacancy Job Description or Vacancy Notes to be added to Broadbean advert.

This is set up in Maintenance – General Settings – Settings 643.

Broadbean Email Body Text saved in IQX

The source of the application and email body text is now visible in the Import Candidate and add to Shortlist view. The email body text is stored as a contact event in the candidate record.

To save the text as a Contact Event a new contact event code can be set up in Maintenance - Agency Set up - Contact Event Types. A contact event code must be inserted in Maintenance - General Settings - Settings 642.

Semi-automatic import of Suitable candidates

Where Broadbean has ranked CVs outside IQX, 'Suitable' candidates can now be semi-automatically imported into IQX. When users press the Retrieve Candidates button, the Import Candidate And Add to Shortlist view is automatically called for each new 'Suitable' Candidate.

Where there are potential duplicate candidates that are Duplicate Candidate window will be displayed.

Increase BroadbeanCandidate filename field size

Some candidates may submit CV's with a document title up to 100 characters in length. Broadbean

and IQX is able to add long CV documents to the database.

Invoicing, attaching timesheets. If general setting is on can turn off at company

When invoicing, the choice of NOT sending linked timesheets with an invoice can be set at global and account level.

The global setting to not include linked timesheets is Maintenance - General Settings - Accounts 240.

240 Accounts	PDF Invoice includes scanned timesheets	Y
--------------	---	---

Local setting is in Company - Accounts - Invoice PDF exclude timesheets.

Invoice PDF exclude Timesheets	<input type="checkbox"/>
--------------------------------	--------------------------

Generally, local settings override global settings.

Timesheet. Cancel reasons can be used

The timesheet Cancel or Correct process has been enhanced by the inclusion of a drop-down list of previously set up reasons e.g. rates, client, hours, breaks.

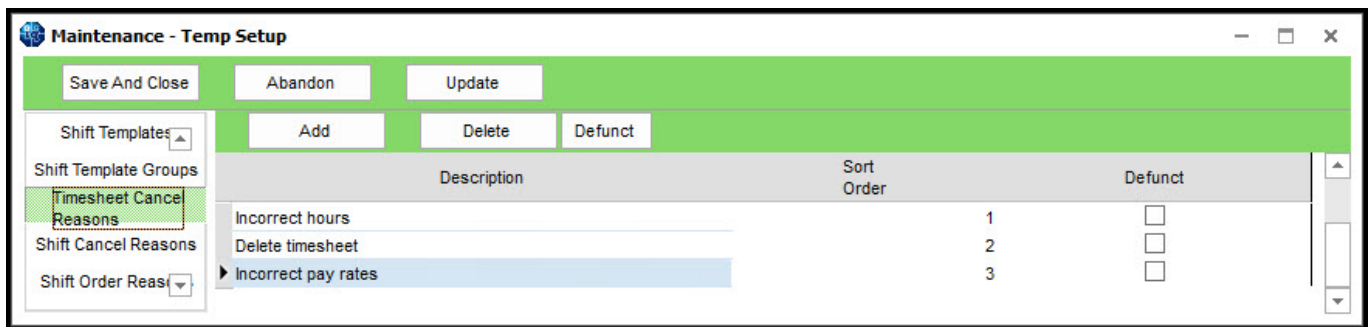

Timesheet for Beedley Johnathon as Veg Prep at ...

Select a Cancel Reason

Incorrect hours
Incorrect pay rates
Delete timesheet

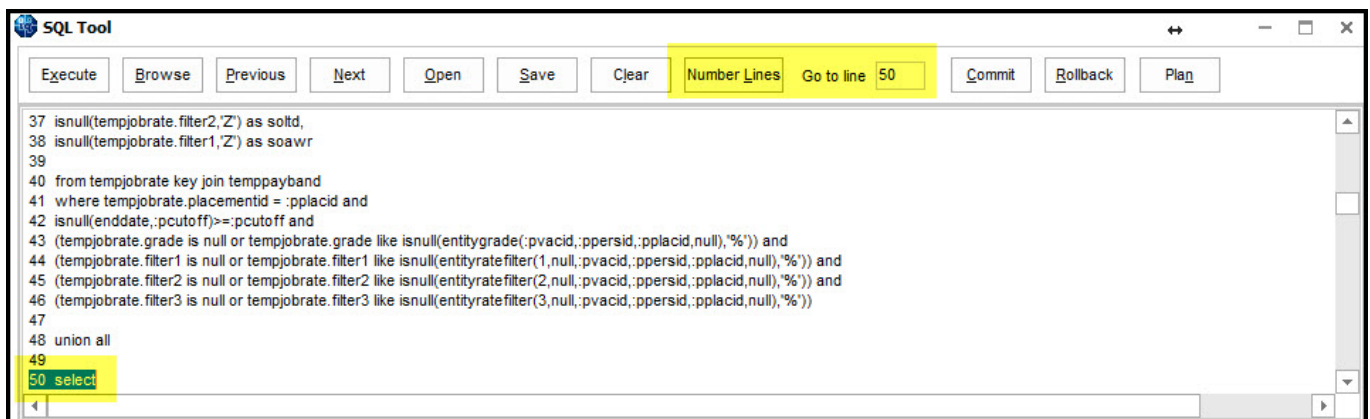

The reasons will appear on both the cancelled and amended timesheets.

Reasons can be set up in Maintenance - Temp Setup - Timesheet Cancel Reasons.

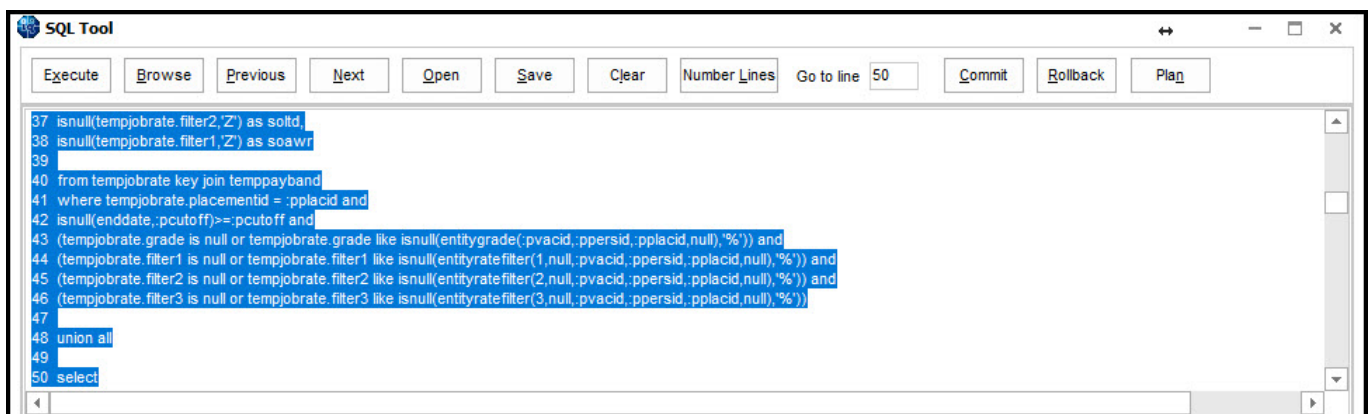

SQLTool. Line numbering and go to line added

In Maintenance – SQL Tool line numbering and a ‘go to line number’ sections have been added.

In addition, pressing Ctrl + A acts as a shortcut to select all SQL.

Validation function for consultant change on major records

A new function has been added which enables a System Administrator to stop changes to the consultant field in major records.

This function can be inserted in Maintenance – Database Functions – Change Functions – Consultant Change.

Below is an example of a validation function which validates a change in consultant.

Validation functions can open forms with specified views

New parameter has been added which allows validation functions to open up forms with specified views.

For example: set "rv" = '^P'"persid"'»PAYROLL'"char(9)'"This temp has no NI number. Please enter this immediately' will open up the person form with the payroll view open for the user to complete the temp's national insurance number.

The format is: [^][{P|C|E|L| I|T|V}id][>>view][<TAB>message]
This applies to validations returning P,C,E,L and V only.

If a view doesn't exist or cannot be selected it will open with the first view.

Notifications

An alternative to Branding is being developed to improve notification workflow. A robust system for shift notifications is the first stage of this process.

But Notification templates are set up in Maintenance - Temp Setup - Notifications. Here templates can be set up according to transmission type, notification type, recipient type and template.

Below is an example of a template for email query candidate about shift confirmation. Boilerplate text codes can be used in the templates as well as HTML emails.

Temp Timesheet Complete		Temp Desk Expiry Alert Extra

Maintenance, Database Diagnostics, Connections. All connected users button added

In Maintenance – Database Diagnostics – Connections there is now a button which allows the display of all connected users.

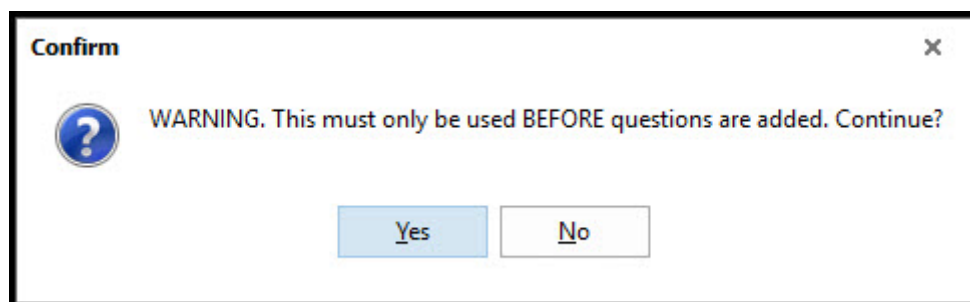

Maintenance, Document Types. Add and Remove Buttons added

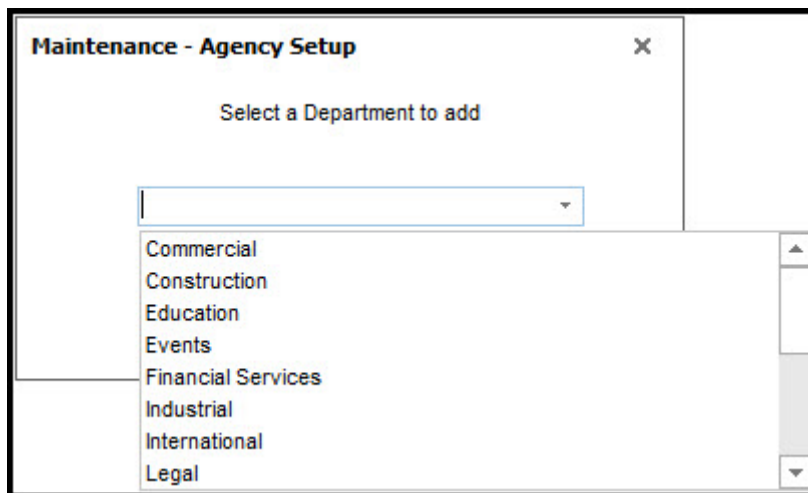

In Maintenance – Agency setup – Document types three new buttons have been inserted, (Initial Departments, Add Department and Remove Department).

These buttons only work where the document type has compliance ticked against it.

A warning message will appear if initial departments is selected informing the user that setting initial departments must be done before questions are added.

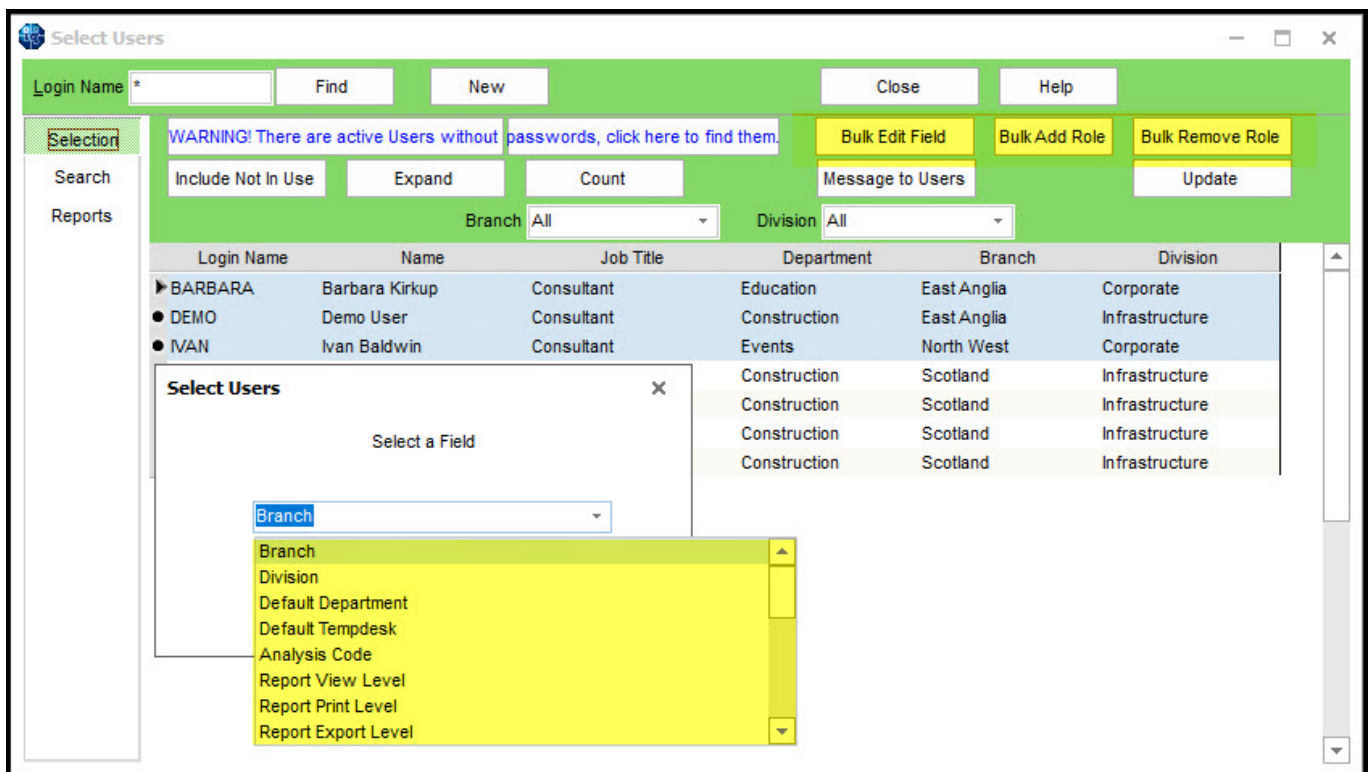

Add and Remove Department buttons give the user the option to select the Department to add or remove.

Bulk allocate or unassign roles/report level/inbox/ to multiple users

Three new buttons have been added to Maintenance - Users which allow a System Administrator to allocate, or assign, report levels and in boxes to multiple users. To use this function select users you require to make the global change to and select the fields you wish to change.

Login Name	Name	Job Title	Department	Branch	Division
BARBARA	Barbara Kirkup	Consultant	Education	East Anglia	Corporate
DEMO	Demo User	Consultant	Construction	East Anglia	Infrastructure
IVAN	Ivan Baldwin	Consultant	Events	North West	Corporate

Likewise, to add or remove a role users and click add role or remove role as appropriate and select the required role and complete the questions.

Changing sort order on Questionnaire

In Maintenance - Agency Setup - Departments - Questionnaires and Maintenance-Questionnaires and new button has been added Redo Order.

	State	Simple just be?
	Perm Placed	Can you do a headstan

Woodpecker Script BROWSECURURL added

The new parameter BROWSECURURL has been added allowing the creation of a button which reports the current browser URL. This information can be used when writing/drafting reports.

Ability to see account information for orphaned account codes

where an account code has become of linked from a company it is now possible to see the account information and a list of the documents/payments etc. In accounts setup - accounts and for sales ledger IDs clicking the document button will display company, accounts for linked accounts or a list of documents for unlinked accounts.
