Adding a Person from a CV

Open the CV in Word and use the  macro button that should be installed on your PC by your Agency. For Word Versions before 2007 the IQX Icon will show on the menu bar on the right. For Word Versions after 2007 there will be an extra Menu item called Add-Ins and the IQX Icon will be in that view.

The right hand side will show the data as it is added.
Thereafter use the Next button and work through the wizard as usual.
You will have the CV on display to help fill in the Questionnaires.

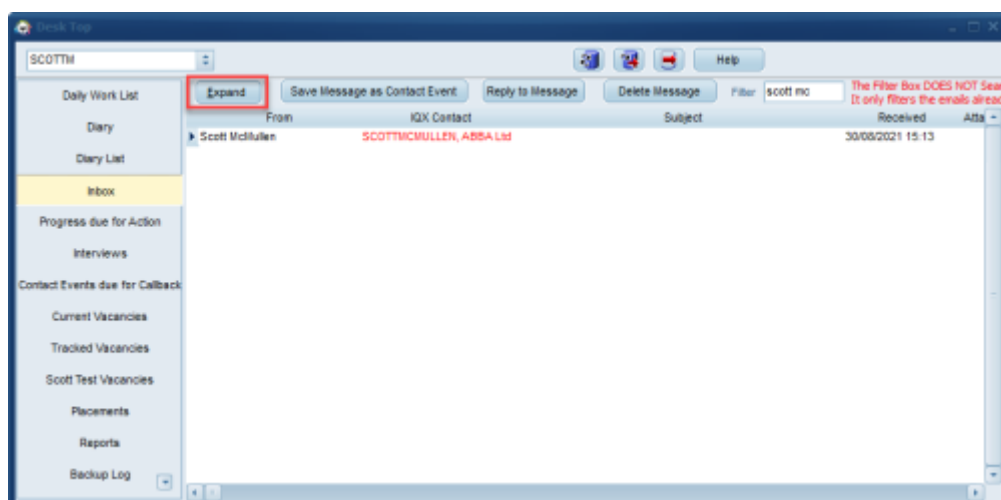

From version 2.20.9 onwards it is also possible to import History for a candidate when you are parsing their CV or highlight the information, right click and select Employment History from the menu. You can link to companies that already exist in IQX and those that don't.

Directly from IQX Inbox

You can now load a CV into the New Person wizard directly from your inbox in IQX. From here you can parse the CV and create the new person as you normally would from a Word CV or New button. The email has to be visible in your inbox in IQX (in the inbox limit set in IQX). The CV has to be in either TXT, PDF or Docx format. To do this follow these steps.

Find the email that has the CV you want in your IQX inbox and click on Expand.

Click on the required CV / Document to select it. Once you have clicked on the CV to select it click on the 'Add New Person' button.

This will load the CV text into the New Person Wizard and allow you to Parse the CV and create the new person.
