

Linking Questions to Compliance Documents

Compliance documents are set up as Document Types in Agency Setup and can only be administered by Users with the relevant roles.

Only candidate document types can be compliance. When adding a document of a compliance type, it prompts or forces you to answer questions before allowing you to complete.

Document type can be linked to more than 1 question. Open the questions list using the **Question** button and tick the questions that you want to show when adding a document of this type.

- Required means MUST exist before a compliance document can be added and before a doc pack can be sent. Doesn't let you save unless you have answered the question if question set as required.

- Included means question appears when adding doc but not forced to answer it to be able to add the document.

Adding Compliance Documents

Documents can be added directly to compliance documents by dragging and dropping onto the view.

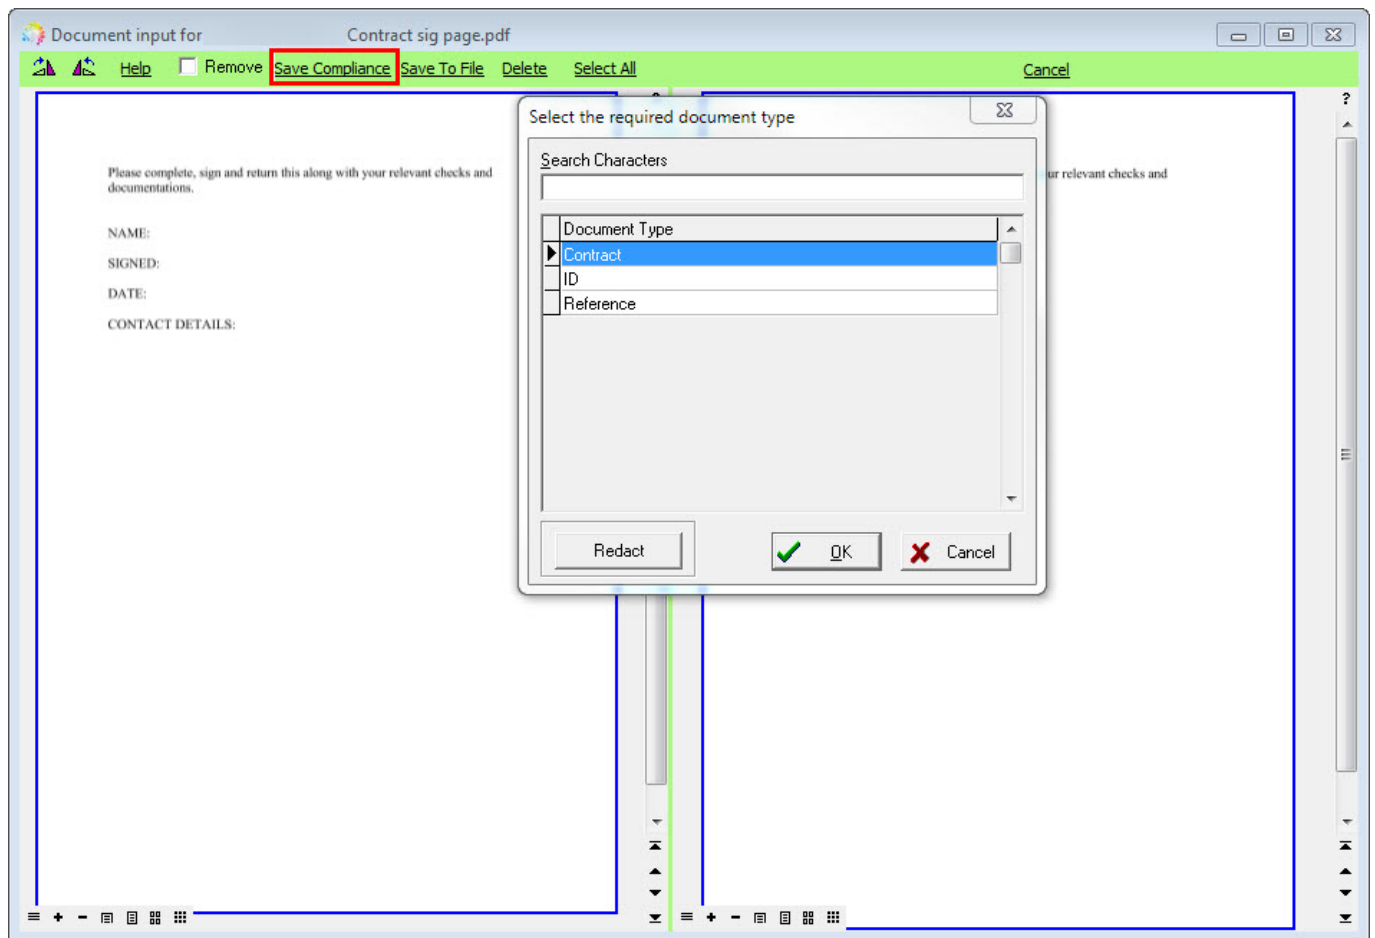

Or if the file exists already in documents then use the Copy to compliance button.

Copy to Compliance

The document will be opened in PDF. It can be saved as a whole document by using Select all or it can be split up by selecting individual pages.

Once you have selected the pages to save, use the Save to Compliance. Select the document type from the box and OK.

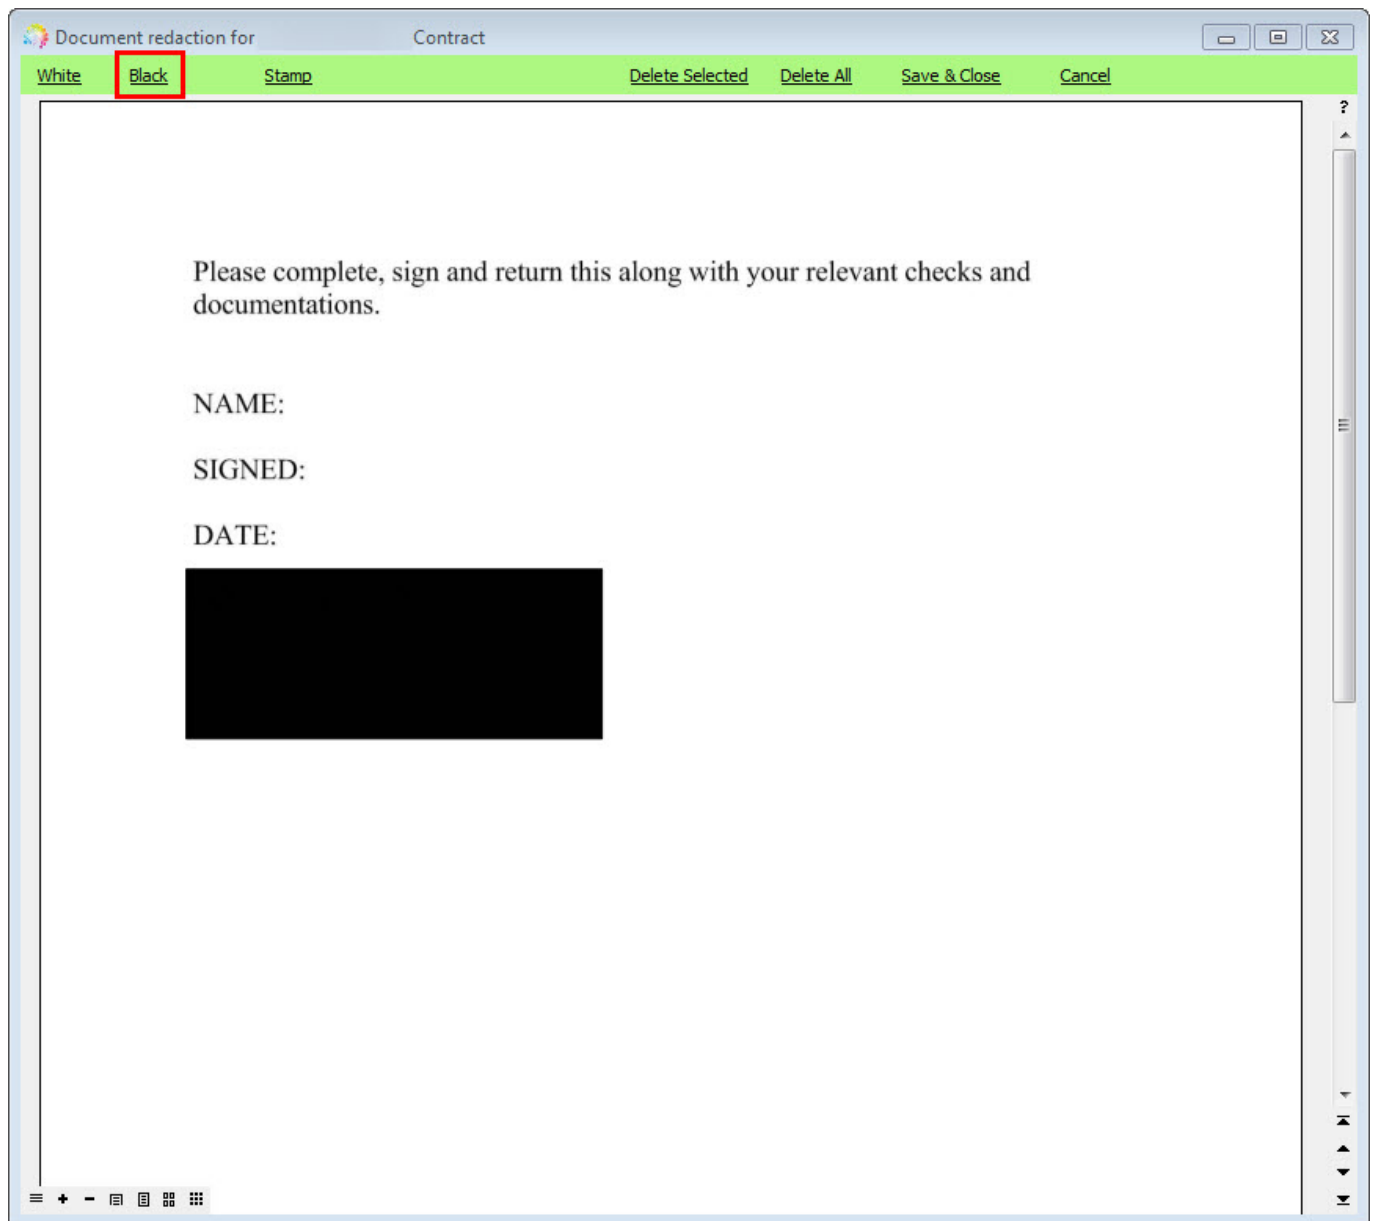

The linked questions will appear to be completed, any that are marked as **required** must be completed at this time.

A screenshot of a web application window titled "Contract for". The window has a light green header bar. Below the header, there are two rows of data: "Face to Face Interview" with a date of "26/11/2014" and "Security Cleared" with a value of "Passport". The main content area is a large green rectangle. A modal dialog box titled "IQX" is displayed in the center, with the message "You are required to enter Security Cleared" and an "OK" button. At the bottom right of the main window, there are two buttons: a green "OK" button with a checkmark and a red "Cancel" button with an 'X'.

Documents can also be redacted using the Redact button at the time of adding the document or once added.

Redact as white or black (or stamp if stamp exists in folder).

In the Compliance Documents view, all details including created, updated and accessed dates for each document can be seen.
