Apply an IQX configuration update

From time to time you may receive a new configuration for your copy of IQX. This file contains updates to screen form layouts etc and will usually have a name like WPK*.xml, where * may be a date or version number.

These updates can be applied by any user with maintenance rights, and can be applied while other users are in the database.

- If you also received a new version of the IQX application at the same time, run the database update first.
- Log in to IQX as normal
- From the menu choose **Maintenance** then **Run a Job**
- Select the xml file and press **Open**
