

User Personalisation - Set Up

Themes and Colour available as User choice in File menu

There is a new setting within each individual user's File menu that let's them select an alternative Theme and Form Colour .

Note: Changes will take effect when the user next logs in.

Check that you have the following vsf files in your server program directory, where the exe is run from.

File=Light-iqx2.vsf

File=Luna.vsf

File=TurquoiseGray-iqx.vsf

File=AmethystKamri-iqx.vsf

File=SmokeyQuartzKamri-iqx.vsf

File=SapphireKamri-iqx.vsf

In the IQX.ini file replace the existing Themes section with

[ThemeList]

Amethyst Kamri=AmethystKamri-iqx.vsf

Sapphire Kamri=SapphireKamri-iqx.vsf

Smokey Quartz Kamri=SmokeyQuartzKamri-iqx.vsf

Turquoise Gray=TurquoiseGray-iqx.vsf

Light=light-iqx2.vsf

Luna=Luna.vsf

[Theme]

;Uncomment one of the following to change the program font:

;Font=Arial

;Font=Cambria

;Font=Marigold

;Font=Segoe

;Font=Calibri

;Font=Tahoma

;Uncomment one of the following to enable a visual theme (the file must be present in the exe folder):

;File=Light-iqx2.vsf

File=Luna.vsf

;File=TurquoiseGray-iqx.vsf

;File=AmethystKamri-iqx.vsf

;File=SmokeyQuartzKamri-iqx.vsf

;File=SapphireKamri-iqx.vsf

;Uncomment the following line to combine the old IQX form colour scheme with the above theme (works better with some themes than others):

UseFormColours=1

;Uncomment the following line to use the system border style on forms rather than the theme border style

;UseSystemBorder=1

Ensure that you have enabled a theme to be the default, by removing the leading semi colon. In the code above Luna has been made the default.

When users next login the File menu, Customise will offer a choice of themes.

Alternative IQX button bar - left position and new icons

An alternative IQX button view has been set up in IQX to give the User more flexibility arranging their view of IQX. A User will be able to switch the button bar between the existing horizontal top view and the new vertical left view, according to personal preference.

Ensure you have enabled the options for the button bar by going to General settings - 2860 - Show Alternative Menu Bar by adding a Y in the Value box.

The button images need to be imported. Contact IQX support for instructions on setting up this feature.
