

IQX Net Admin

1. After IQXNet has been licensed in the database and the set up completed, the next step is to give IQX User(s) rights to administer IQXNet Users (and maintenance if they also have maintenance role).

* Go to the User record (Maintenance> Users) under ROLES, look at the ROLE GROUP 'IQXNET' and assign 'Can administer IQXNet Users'

Role Group	IQXNET	<input type="text"/>	Search		
Group	Role	Search Criteria Group	Assigned	Expires	Notes
▶ IQXNET	Can administer IQXNet users		<input checked="" type="checkbox"/>		And Maintenance set...

2. IQXNet Settings to be set. User Classes, Rights, Class Rights etc. These create a profile of what is available to be done on the portal depending on the class of User you set them as.

3. Clients / candidates need to be given Website Rights using the  website rights button on their record.

When setting up a user, you will set them for example as a Client User and this will then use the default rights allocated to that class of user.

IQXNet User Barbara Kirkup, 10 Group PLC
